

# 1D0-532

## CIW

*CIW Web Developer*

<http://www.ipass4sure.com/exams.asp?examcode=1D0-532>

The 1D0-532 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 1D0-532 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 1D0-532 exam is very challenging, but with our 1D0-532 questions and answers practice exam, you can feel confident in obtaining your success on the 1D0-532 exam on your FIRST TRY!

### CIW 1D0-532 Exam Features

- Detailed questions and answers for 1D0-532 exam
- Try a demo before buying any CIW exam
- 1D0-532 questions and answers, updated regularly
- Verified 1D0-532 answers by Experts and bear almost 100% accuracy
- 1D0-532 tested and verified before publishing
- 1D0-532 exam questions with exhibits
- 1D0-532 same questions as real exam with multiple choice options

Acquiring CIW certifications are becoming a huge task in the field of I.T. More over these exams like 1D0-532 exam are now continuously updating and accepting this challenge is itself a task. This 1D0-532 test is an important part of CIW certifications. We have the resources to prepare you for this. The 1D0-532 exam is essential and core part of CIW certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 1D0-532 Test and save time and money while developing your skills to pass your CIW 1D0-532 Exam? Let us help you climb that ladder of success and pass your 1D0-532 now!

**Question: 1**

To develop a JAX-RPC Web Service application, a vendor-supplied development tool is used to create which of the following?

- A - WSDL document
- B - Skeleton class
- C - XML Schema
- D - SOAP messages

**Answer: A, B**

**Question: 2**

A SOAP file cannot include which of the following?

- A - DTD
- B - Envelope
- C - Body
- D - Namespace
- E - Processing instructions

**Answer: A, E**

**Question: 3**

All of the following are faultcode values defined in the SOAP 1.1 specification EXCEPT:

- A - VersionMismatch
- B - MustUnderstand
- C - Client
- D - Server
- E - Network

**Answer: E**

**Question: 4**

Valid reasons to use a Schema rather than a DTD when defining an XML document include all of the following EXCEPT which?

- A - Schemas are more widely used.
- B - Schemas are described with XML syntax.
- C - Schemas are used to validate documents on content as well as data types.
- D - Schemas are capable of using namespaces.

**Answer: A**

**Question: 5**

An application is designed to allow a customer to order concert tickets through a Web Service, If all other factors are identical, which scenario is LEAST likely to be appropriate for this application?

- A - Asynchronous Messaging
- B - Request/Response
- C - Remote Procedure Call
- D - Conversational Message Exchange

**Answer: A**

**Question: 6**

Which Web Services specification is most similar to a Java interlace?

- A - UDDI
- B - SOAP
- C - WSDL
- D - ebXML

**Answer: C**

**Question: 7**

The APIS used with JAXM applications are defined in which packages?

- A - javax.xml.messaging
- B - javax.xml.soap
- C - javax.xml.rpc
- D - javax.xml.registry

**Answer: A, B**

**Question: 8**

An XML document that is valid:

- A - complies with XML syntax rules and the constraints described in a DTD or Schema.
- B - complies with XML syntax rules but not the constraints described in a DTD or Schema.
- C - does not necessarily comply with XML syntax rules but only the constraints described in a DTD or Schema.
- D - does not necessarily comply with XML syntax rules or the constraints described in a DTD or Schema, but can be parsed with an HTML browser.

**Answer: A**

**Question: 9**

Which of the following is NOT a major element used to define a service in WSDL?

- A - Types
- B - Message
- C - Port type
- D - Service
- F - Namespace

**Answer: E**

**Question: 10**

Which two scenarios will always result in the init method of a servlet being invoked?

- A - Every time a new client accesses the servlet
- B - When the server automatically reloads the servlet
- C - When an HTTP INIT type request is made by a client
- D - When the servlet is put into service after loading and instantiation

**Answer: B, D**

**Question: 11**

It four classes were instantiated in the following order, implementing the associated event listener, in what order would they be notified if the application were shut down?

CustomConnectionManager implements HttpSessionListener  
CustomerManager implements ServletContextListener  
OrderManager implements HttpSessionListener  
ShoppingCartManager implements HttpSessionListener

- A - ShoppingCartManager, OrderManager, CustomerConnectionManager, CustomerManager
- B - ShoppingCartManager, CustomerManager, OrderManager, CustomConnectionManager
- C - CustomerManager, ShoppingCartManager, OrderManager, CustomConnectionManager
- D - CustomerManager, CustomConnectionManager, OrderManager, ShoppingCartManager

**Answer: A**

**Question: 12**

What is the best scope in which to store an object containing display data that is to be sent from a servlet acting as a controller to a JSP page with the session disabled?

- A - page
- B - request
- C - session
- D - application/servletContext

**Answer: B**

**Question: 13**

Which of the following is considered the best way to design a flexible API that does not require a servlet per activity?

- A - Embed the activity name in a hidden field. Let the servlet read the field to determine what must occur.
- B - Create a query string containing the activity name as a parameter. Let the servlet read the parameter to determine what must occur.
- C - Use a servlet mapping to make requests with the same suffix. Change the prefix to the action and let the servlet read the whole URL to determine what is required.

**Answer: C**

**Question: 14**

Which interface should an object implement in order to be notified that it is about to be added to or removed from the session?

- A - HttpSessionBindingListener
- B - HttpSessionActivationListener
- C - HttpSessionAttributeListener
- D - EventListener

**Answer: A**

**Question: 15**

A client has accessed a servlet via a form that uses an HTTP POST request. Which two methods could be used by the servlet to obtain information input within the form?

- A - Using the servlet object's getServletInfo method

## Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
