QUESTION: 6
HP recently hold a regional event where its customers, partners, and employees received Updates on HP Converged Cloud. After the event, the CIO from an existing HP CloudSystem Matrix 6.3 customer contacted you to explain that he needs to expand his private cloud environment beyond the current capabilities. He is practically concerned about controlling his private cloud as well as offering his business units an alternate to Amazon. The concern is that he has no control today over the Amazon environments that his business units are using. Which statement provides the primary HP Converged Cloud Strategy benefits for this customer?

A. HP Converged Cloud is ideal for managing traditional IT environments by leveraging the current infrastructure.
B. HP converged Cloud is built on converged infrastructure. Converged Information, and Converged management and Security.
C. HP Converged Cloud makes use of REST APIs to facilitate integration with external systems. OpenStack APIs are an enabler for interoperability, integration, and community leverage, and will be completed with additional APIs over time.
D. HP Converged Cloud is the industry's first hybrid delivery approach and portfolio based on architecture spanning traditional IT, private, managed, and public clouds.
