- A. During the integration with the Presence Server
- B. During the installation of the Avaya one-X® CES solution template.
- C. Before the template installation as a prerequisite
- D. Only after the installation of the template has completed

Answer: B

QUESTION: 5

A telephony service (Session Manager) is going to be taken offline during a maintenance window. To reduce user problems and error messages on the CES system, you need to stop communications between the CES and the Session Manager. Which procedure on the Avaya one-X® CES server will temporarily stop the telephony services associated with this server?

- A. Navigate to the Avaya one-X® Servers tab. Select Telephony Locate the Telephony services Click the Suspend button
- B. Navigate to the Avaya one-X® System tab Select SIP Local Locate the telephony services
- C. Navigate to the Avaya one-X® CES System tab Select SIP Local Locate the telephony services Click on the Suspend button
- D. Navigate to System Platform Select Virtual Machine management Locate the CES virtual machine Click on Suspend button.

Answer: A

QUESTION: 6

In the process of migrating user data from Avaya one-X® Portal 5.2 to Avaya one-X® CES, you discover that all of the user data was not imported. You have checked to ensure that the server names are the same between the two systems, and the system profile and group profile are present. Which statement correctly describes the last action you need to take to discover why all of the user data was not imported?

- A. Ensure all of the users are present in the Provisioned User Tab on the Avaya one-X® CES server.
- B. Ensure all of the users are present in the User Data tab on the System Manager.
- C. Ensure all of the users are present in the Unprovisioned User Tab on the Avaya one-X® CES Server.
- D. Ensure all of the users are present in the User data tab on the Session Manager.

Answer: C

QUESTION: 7

During the Avaya one-X® CES template installation, a technique installs a co-resident Handset Server. However, it is now determined that the Handset Server will be deployed on a different server. Which set of procedure is required to remove the co-resident Handset Server functionality from the Avaya one-X® CES?

- A. Login to the System Platform Navigate to Virtual Machine Management and run the Avaya one-X® CES template configuration wizard Deselect the Handset Server option Restart the CES.
- B. Login to the Avaya one-X® CES system via the web administration page. Navigate to Servers – Handset Configuration Deselect the Handset Server option Restart the CES
- C. Login to the Restart the CES system via the command Line Interface tool. Enter the command: Handset Server disable Restart the CES.
- D. Login to the System Platform Navigate to Virtual Machine Management Reinstall the Restart the CES system template with the Handset Server option deselected.

Answer: A

QUESTION: 8

Which two servers are optional with regard to the Restart the CES solution? (Choose two)
