

PB0-200

APC

APC NCPI Design

Thousands of IT Professionals before you have already passed their PB0-200 certification exams using the APC PB0-200 Practice Exam from ipass4sure.com. Once you start using our PB0-200 exam questions you simply can't stop! You are guaranteed to pass your APC PB0-200 test with ease and in your first attempt.

Here's what you can expect from the [ipass4sure](http://ipass4sure.com) APC PB0-200 course:

- * Up-to-Date APC PB0-200 questions designed to familiarize you with the real exam.
- * 100% correct APC PB0-200 answers you simply can't find in other PB0-200 courses.
- * All of our tests are easy to download. Your file will be saved as a PB0-200 PDF.
- * APC PB0-200 brain dump free content featuring the real PB0-200 test questions.

APC PB0-200 Certification Exam is of core importance both in your Professional life and APC Certification Path. With APC Certification you can get a good job easily in the market and get on your path for success. Professionals who passed APC PB0-200 Certification Exam are an absolute favorite in the industry. If you pass APC PB0-200 Certification Exam then career opportunities are open for you.

Our PB0-200 Questions & Answers provide you an easy solution to your APC PB0-200 Exam Preparation. Our PB0-200 Q&As contains the most updated APC PB0-200 real tests. You can use our PB0-200 Q&As on any PC with most versions of Acrobat Reader and prepare the exam easily.

Exam Name:	APC NCPI Design		
Exam Type:	APC	Exam Code:	PB0-200
Doc Type:	Q & A with Explanations	Total Questions:	105

Question: 1

What is TVSS?

- A. Transient voltage Static Switch
- B. Terminal Voltage Surge Suppression
- C. Transient voltage surge suppression
- D. Transient variable surge suppression

Answer: C

Question: 2

If a rack-mount PDU is accidentally overloaded, which device activates and isolates the electric power to the outlets?

- A. TVSS
- B. Transformer
- C. Circuit breaker
- D. Automatic Transfer Switch

Answer: C

Question: 3

What physical property of all electrical equipment dictates the amount of cooling it will require?

- A. size of printed circuits boards
- B. weight of electronic components
- C. location of components inside equipment
- D. inefficiency of power and digital components

Answer: D

Question: 4

What is current?

- A. the flow of electrons through a conductor
- B. the potential difference between two points
- C. the capability of a conductor to store a charge
- D. the amount of voltage flowing through a conductor

Answer: A

Question: 5

What distinguishes precision cooling from comfort cooling with regard to airflow?

- A. Precision cooling has approximately 160 fm/kw vs 90 cfm/kw for comfort cooling
- B. Precision cooling has approximately 90 fm/kw vs 160 cfm/kw for comfort cooling
- C. Precision cooling must use a ducted airflow supply while comfort cooling must use a free airflow supply.
- D. Precision cooling must use a free airflow supply while comfort cooling must use a ducted airflow supply.

Answer: A

Question: 6

Which type air conditioning system generally has the lowest initial cost for the entire system?

Exam Name:	APC NCPI Design		
Exam Type:	APC	Exam Code:	PB0-200
Doc Type:	Q & A with Explanations	Total Questions:	105

- A. air cooled
- B. chilled water
- C. water cooled
- D. glycol cooled

Answer: A

Question: 7

What is "voltage"? (choose two)

- A. Electromotive Force (emf)
- B. The flow of electrons through a conductor
- C. The potential difference between two points
- D. The ability of a component to store a charge
- E. The energy given off as heat in an electric circuit

Answer: A, C

Question: 8

What are two advantages of ceiling-mounted air conditioners?

- A. A raised floor is not necessary
- B. It does not take up any floor space
- C. It is easily maintained and serviced
- D. Condensation is above the dropped ceiling
- E. A contractor is not necessary for installation

Answer: A, B

Question: 9

What is a 2N UPS system design?

- A. a dual-input single module UPS
- B. a parallel redundant UPS system consisting of two UPS modules
- C. two independent UPS system feeding dual-corded power supplies
- D. one single-module UPS feeding several dual-corded power supplies

Answer: C

Question: 10

Company.com has a 10-year-old computer room with a 30 cm raised-floor plenum. They have just completed a change out of some IT equipment and also re-cabled much of the equipment with Cat5E and fiber. They are now having cooling problems in a few areas of the room. What are two likely causes?

- A. The new IT equipment draws air bottom to top, creating heat plumes around the racks
- B. When the new cabling was added, the old cable was not pulled from the raised-floor plenum, creating air dams.
- C. Some of the new IT equipment is more dense and is generating more heat than the previous equipment at that location.
- D. The new fiber cable emits more heat than the previous copper network cabling, which causes an increase in the temperature of the air leaving the perforated tiles.

Answer: B, C

SAMPLE EXAM

Pass4sure \$89 Lifetime Membership Features;

- Pass4sure \$89 Lifetime Membership includes Over **2100** Exams in One Price.
- **All** Pass4sure **Questions and Answers** are included in \$89 package.
- **All** Pass4sure audio exams are included **free** in \$89 package (See List).
- **All** Pass4sure study guides are included **free** in \$89 package (See List).
- **Lifetime** login access, no hidden fee, no login expiry.
- **Free updates** for Lifetime.
- **Free Download Access** to All new exams added in future.
- Accurate answers with **explanations** (If applicable).
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions, Answers and Study Guides are downloadable in **PDF** format.
- Audio Exams are downloadable in **MP3** format.
- **No authorization** code required to open exam.
- **Portable** anywhere.
- 100% success **Guarantee**.
- **Fast**, helpful support **24x7**.
