

1T6-540

Network-General

Advanced Troubleshooting with InfiniStream Network Mgmt

Thousands of IT Professionals before you have already passed their 1T6-540 certification exams using the Network-General 1T6-540 Practice Exam from ipass4sure.com. Once you start using our 1T6-540 exam questions you simply can't stop! You are guaranteed to pass your Network-General 1T6-540 test with ease and in your first attempt.

Here's what you can expect from the [ipass4sure](http://ipass4sure.com) Network-General 1T6-540 course:

- * Up-to-Date Network-General 1T6-540 questions designed to familiarize you with the real exam.
- * 100% correct Network-General 1T6-540 answers you simply can't find in other 1T6-540 courses.
- * All of our tests are easy to download. Your file will be saved as a 1T6-540 PDF.
- * Network-General 1T6-540 brain dump free content featuring the real 1T6-540 test questions.

Network-General 1T6-540 Certification Exam is of core importance both in your Professional life and Network-General Certification Path. With Network-General Certification you can get a good job easily in the market and get on your path for success. Professionals who passed Network-General 1T6-540 Certification Exam are an absolute favorite in the industry. If you pass Network-General 1T6-540 Certification Exam then career opportunities are open for you.

Our 1T6-540 Questions & Answers provide you an easy solution to your Network-General 1T6-540 Exam Preparation. Our 1T6-540 Q&As contains the most updated Network-General 1T6-540 real tests. You can use our 1T6-540 Q&As on any PC with most versions of Acrobat Reader and prepare the exam easily.

Question: 1

Applications that use ephemeral ports on both sides of a connection are difficult to mine, because:

- A. The ephemeral ports cannot be predicted
- B. They all use the same port, TCP/1024
- C. The well-known ports cannot be predicted
- D. The ephemeral ports can be predicted but the port pairings are always different

Answer: A

Question: 2

Mining FTP frames for both the Control and Data connections is difficult, because:

- A. The server listens on TCP/20 and on ephemeral addresses that are difficult to predict.
- B. The server listens on TCP/21 and multiple addresses that cannot be predicted.
- C. The server listens on TCP/21 and ephemeral ports that are difficult to predict.
- D. Many implementations of FTP exist that use varying well-known ports.

Answer: C

Question: 3

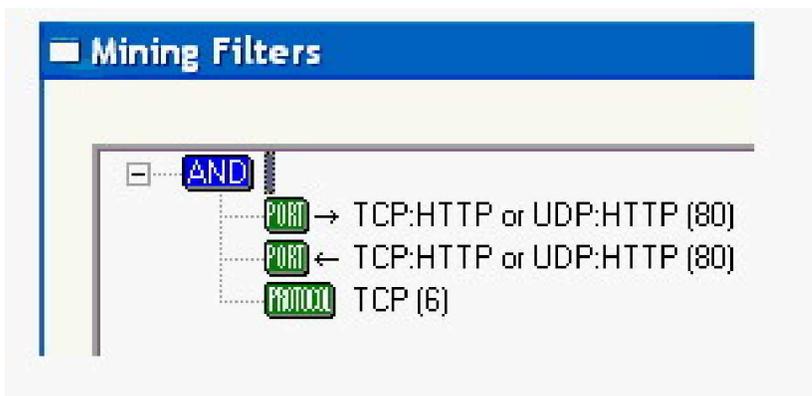

Which of the following is NOT typically associated with network security auditing?

- A. Inspection of passwords
- B. Examining a network for signs of misuse
- C. Troubleshooting network application efficiency
- D. Looking for conformance to policy

Answer: C

Question: 4

Consider this illustration of a data mining filter. What is wrong with it?

- A. The filter only allows packets that are sent to HTTP servers on their well-known port. It would only show commands without replies. This filter is incomplete.
- B. The filter only allows packets that are both to and from the well-known port TCP/80 (HTTP). Both source and destination port cannot be 80. Nothing would pass the filter.
- C. It would also allow UDP packets to and from port 80 (HTTP), which does not make sense, since HTTP is a TCP-based protocol.
- D. Nothing. It will capture normal data to and from TCP/80 (HTTP) servers.

Answer: B

Question: 5

The easiest way to identify data for further analysis is to _____.

- A. create an alias
- B. group multiple protocols together
- C. sort on port number
- D. select all ephemeral ports

Answer: C

Question: 6

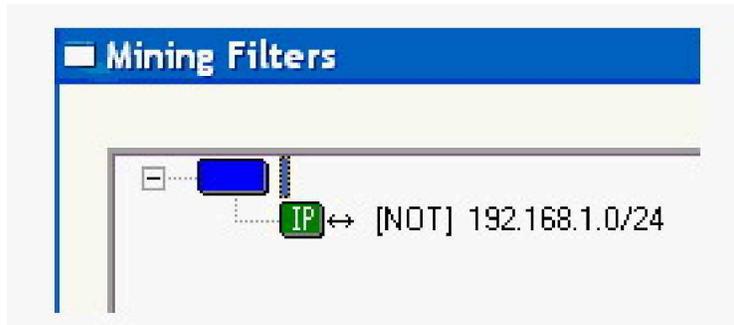

A one to many relationship is indicative of:

- A. Backdoors
- B. Clients sending email to a relay server
- C. Password guessing
- D. Peer-to-Peer

Answer: D

Question: 7

Consider this mining filter. Which description most accurately describes what it does?

- A. It includes all packets to and from network 192.168.1.0/24.
- B. It includes all packets that have sources and destinations within network 192.168.1.0/24.
- C. It includes all packets that are not to or from network 192.168.1.0/24.
- D. Nothing. No packets would pass this filter.

Answer: C

Question: 8

Time duration and speed are _____.

- A. primary limitations of mining and analysis
- B. not relevant to InfiniStream
- C. only related to Expert analysis
- D. relevant, but secondary issues

Answer: A

Question: 9

For testing, it is useful to convert your _____ into _____.

- A. data / units of measurement
- B. hypothesis / an if-then statement
- C. hypothesis / a conclusion
- D. conclusion / if-then statement
