

# 000-094

## IBM

*Application Development with IBM WebSphere Integration  
Developer V6.0.1*

Thousands of IT Professionals before you have already passed their 000-094 certification exams using the IBM 000-094 Practice Exam from [ipass4sure.com](http://ipass4sure.com). Once you start using our 000-094 exam questions you simply can't stop! You are guaranteed to pass your IBM 000-094 test with ease and in your first attempt.

Here's what you can expect from the [ipass4sure](http://ipass4sure.com) IBM 000-094 course:

- \* Up-to-Date IBM 000-094 questions designed to familiarize you with the real exam.
- \* 100% correct IBM 000-094 answers you simply can't find in other 000-094 courses.
- \* All of our tests are easy to download. Your file will be saved as a 000-094 PDF.
- \* IBM 000-094 brain dump free content featuring the real 000-094 test questions.

IBM 000-094 Certification Exam is of core importance both in your Professional life and IBM Certification Path. With IBM Certification you can get a good job easily in the market and get on your path for success. Professionals who passed IBM 000-094 Certification Exam are an absolute favorite in the industry. If you pass IBM 000-094 Certification Exam then career opportunities are open for you.

Our 000-094 Questions & Answers provide you an easy solution to your IBM 000-094 Exam Preparation. Our 000-094 Q&As contains the most updated IBM 000-094 real tests. You can use our 000-094 Q&As on any PC with most versions of Acrobat Reader and prepare the exam easily.

### Question: 1

How should a developer invoke the Currency Convert or HTTP web service asynchronously in this module, if possible at all?

- A - Update the Binding properties of the Import to specify the Invocation style is Asynchronous.
- B - Specify the Preferred interaction style is Asynchronous in the details of the Import.
- C - Ensure the Invoke activity specifies No response for the Response variable.
- D - This service cannot be called asynchronously.

**Answer: D**

### Question: 2

As part of a large integration project, the solution calls for an application to use a resource adapter. While running the Enterprise Service Discovery Wizard, the integration developer is asked whether to Deploy connector with module. A major concern centers around future upgrading of adapters used by multiple modules. How should the integration developer configure Deploy connector with module?

- A - Deploy the adapter with the module.
- B - Deploy the adapter in a separate module.
- C - Deploy the adapter both in this module for use by this application and in a module by itself for use by other applications.
- D - It does not make a difference where the adapter is deployed since the adapter upgrade wizard will walk the developer through the process and upgrade all selected instances of the adapter.

**Answer: B**

### Question: 3

Given the following configuration for and assuming the incoming data in of Object type:

**Import: Import (JMS Binding)**

JMS Import Binding | Connection | Resource Adapter | JMS Destinations | Method Bindings

Adapter Type: WebSphere Default Messaging Provider version 0.3

Connection

JNDI Lookup Name:

Managed Connection Factory:

JMS Destinations

Send Destination Type:

Receive Destination Type:

Data Type:

Binding Description:

Which of the following statements is correct?

- A - The binding will fail because the data type needs to be changed to `com.ibm.websphere.sca.jms.data.impl.JMSDataBindingImplXML`.
- B - There are no issues with the current configuration if the configuration is left as is.
- C - The binding will fail at runtime because the JNDI name is missing.
- D - More fields need to be displayed on the JMS Import Binding tab in order to determine if the configuration is correct.

**Answer: B**

**Question: 4**

A developer needs to invoke an external web service from business process. Which statement accurately describes an action that the developer must take?

- A - Create an export in the web project containing the web service
- B - Create an export in the module where the business process resides
- C - Create the wsdl file describing the external service into the module where the process resides
- D - Copy the wsdl file describing the business process into the project containing the web service

**Answer: C**

**Question: 5**

Given the following configuration in a short running business process:

**Snippet**

Transactional Behavior:  Commit Before  Commit After  Participates  Requires Own

Continue On Error

Enable persistence and queries of business-relevant data

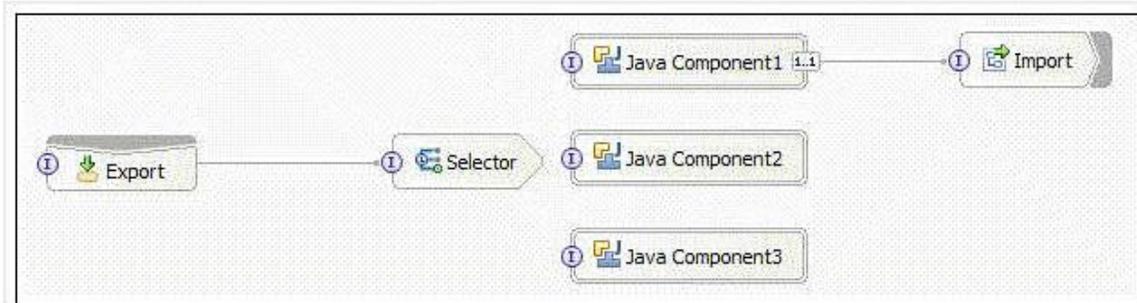

Which of the following statements is correct?

- A - The snippet will run in a new transaction.
- B - There will be a commit just before the snippet runs.
- C - No commit will take place before the snippet runs.
- D - A commit will take place before and after the snippet runs.

**Answer: C**

**Question: 6**

Which of the following statements accurately describes the implications of the following assembly wiring?

- A - The configuration is correct as it is.
- B - The wiring is incomplete. There should be no unconnected elements.
- C - The diagram is incorrect because an export cannot be connected directly to an export.
- D - The assembly is not correct as is, but it can be corrected by removing one of the Java components.

**Answer: A**

**Question: 7**

A developer is building an application for a travel agency. The travel agency will receive calls from customers to obtain quotes for travel. The customers will often need many days to deliberate before they are ready to book a trip. The application should save the customer information and quote that was gathered during the initial call so that this processing does not need to be repeated. What is the most appropriate approach for the developer to handle this type of scenario in a business process?

- A - Add an event handler to create another entry point into the process.
- B - Store the quote, wait, and add a human task to handle the reply.
- C - Add another receive into the process that will be invoked.
- D - Add another receive into the process that will be invoked and add a correlation set.

**Answer: D**

**Question: 8**

A process contains an invoke activity with the continue on error checkbox selected. This long-running process fails and no fault handler exists to catch the fault. The business process engine will do which of the following?

- A - Place the activity in a stopped state.
- B - Place the process in a stopped state.
- C - Create an administrative task for the administrator so that he/she can correct the error.
