- A - From the Microsoft Axapta Configuration Utility.
- B - From the Windows Control Panel.
- C - From the Microsoft Axapta setup wizard.
- D - From a Windows command prompt.

Answer: A

Question: 7

The company you are working for wants to deploy a Live and a Test Enterprise Portal. You have decided that each should be deployed on a separate Web server, but from the same Microsoft Axapta application. Which TWO of the following configurations will you require?

- A - One Business Connector on the Application Server.
- B - Two Business Connectors - one on each Web Server.
- C - In each instance of 113, set the Web site to point at the Microsoft Axapta Business Connector.
- D - In each Web site record in Microsoft Axapta, set the Web server name to the relevant Web server.

Answer: B, D

Question: 8

In the Customer Self-Service parameters, you can see that the 'Start product group' setting has been set as 'SOFTWARE_PRODUCTS'. What does this mean?

- A - Items in the SOFTWARE_PRODUCTS item group can have production orders started via the Enterprise Portal.
- B - Items in the SOFTWARE_PRODUCTS category in the Product Catalog Manager will be displayed when a customer logs into the Enterprise Portal.
- C - When a new product group is created in the Enterprise Portal, its name will default to SOFTWARE_PRODUCTS.
- D - Items in the SOFTWARE_PRODUCTS item group must be selected for an Enterprise Portal Sales Order before other products become available.

Answer: B

Question: 9

You have created a new CSS class in the Cascading StyleSheet Editor for displaying code in a fixed-width font. How do you apply it to text on your web pages?

- A - In the Web Application Editor, highlight the text that should be displayed in a fixed-width font. On the formatting toolbar, select the new CSS class from the CSS list.
- B - In the Web Application Editor, highlight the text that should be displayed in a fixed-width font.

- Right-click on the text and select CSS. Choose the new CSS class from the list.
- C - In the Web Application Editor, open the Page Properties from the Format menu, and add the new CSS class to the CSS list.
 - D - CSS classes can only be applied to text inside Web elements or WebLets, not directly on Web Pages.

Answer: A

Question: 10

Why are label riles used in web application development? Choose TWO.

- A - Because static text cannot be saved into a Web page.
- B - Multi-language websites are easier to deploy and maintain
