

0B0-105

BEA

BEA 8.1 Certified Architect: Enterprise Architecture

Thousands of IT Professionals before you have already passed their 0B0-105 certification exams using the BEA 0B0-105 Practice Exam from ipass4sure.com. Once you start using our 0B0-105 exam questions you simply can't stop! You are guaranteed to pass your BEA 0B0-105 test with ease and in your first attempt.

Here's what you can expect from the [ipass4sure](http://ipass4sure.com) BEA 0B0-105 course:

- * Up-to-Date BEA 0B0-105 questions designed to familiarize you with the real exam.
- * 100% correct BEA 0B0-105 answers you simply can't find in other 0B0-105 courses.
- * All of our tests are easy to download. Your file will be saved as a 0B0-105 PDF.
- * BEA 0B0-105 brain dump free content featuring the real 0B0-105 test questions.

BEA 0B0-105 Certification Exam is of core importance both in your Professional life and BEA Certification Path. With BEA Certification you can get a good job easily in the market and get on your path for success. Professionals who passed BEA 0B0-105 Certification Exam are an absolute favorite in the industry. If you pass BEA 0B0-105 Certification Exam then career opportunities are open for you.

Our 0B0-105 Questions & Answers provide you an easy solution to your BEA 0B0-105 Exam Preparation. Our 0B0-105 Q&As contains the most updated BEA 0B0-105 real tests. You can use our 0B0-105 Q&As on any PC with most versions of Acrobat Reader and prepare the exam easily.

Question : 1

You have determined that your J2EE EJB tier applications should be deployed to a Web Logic Cluster in order to achieve the necessary scalability requirements.

When considering adequate network bandwidth to minimize lost multicast packets, which activity is likely to generate the greatest concentration of multicast traffic?

- A. JNDI updates
- B. JMS Server migration
- C. JMX Mbean monitoring
- D. HTTP Session replication
- E. Web Logic cluster heartbeats

Answer: A

Question : 2

Which UML artifact best describes a Business Process?

- A. Data Model
- B. State Diagram
- C. Workflow Detail
- D. Activity Diagram
- E. Sequence Diagram

Answer: D

Question : 3

In planning most architecture it is considered to be a best practice to avoid long-running XA-transactions. Which of the following is the most compelling reason?

- A. Performance can suffer due to potential XA-resource concurrency bottlenecks
- B. With the XA two-phase commit protocol, there is a greater chance for heuristic conditions
- C. Client applications with shorter transaction timeouts may not wait long enough for transactions to be completed.
- D. Each in-flight transaction requires a unique XID, performance is impacted by excessive transaction context switching
- E. Deadlock situations can occur within the Transaction Manager by tying up all the available threads involved in transaction

Answer: A

Question : 4

Which of the following is true related to Java Virtual Machine (JVM) issues with your Web Logic server deployments?

- A. Web Logic Server does not permit manually forced garbage collection on the JVM
- B. The BEA JRockit JVM must be used to allow for garbage collection scheme choice
- C. Web Logic Server interfaces within the same cluster may use different types of JVMs
- D. A change to the maximum heap size of the JVM does not require a Web Logic server restart
- E. Greater performance is usually achieved by deploying a single multithreaded Web Logic server instance to multiple JVMs.

Answer: C

Question : 5

You have determined that your web applications will be deployed to a Web Logic cluster for high availability. You want to ensure that all HTTP session data is available to other members of the cluster in case of server failure., but replication performance is a high priority. Based on this requirement, which approach would be best to incorporate into your design?

- A. File-based session persistence
- B. In-memory session persistence
- C. Single memory-based session
- D. JDBC-based session persistence
- E. XA-based rapid session synchronization

Answer: B

Question : 6

Within a Service-Oriented Architecture, services in the Connectivity Layer tend to be;

- A. Fine-grained and Synchronous
- B. Fine-grained and Asynchronous
- C. Coarse-grained and synchronous
- D. Coarse-grained and Asynchronous
- E. Both Coarse-grained and Fine-Grained

Answer: A

Question : 7

Which of the following XML-related standards are NOT used in Liquid Data?

- A. XSLT
- B. Xpath
- C. SOAP
- D. XqQUERY
- E. Xml schema

Answer: A

Question : 8

Many users, located in different geographic regions, all need access to certain secure web applications and EJB components. The users although dispersed, have common Job descriptions. What is the best way to generically provide access for all of these users?

- A. Use declarative security by providing authorization based user roles
- B. Programmatically authorize each user who requests a protected resource
- C. Use Security Assertion Markup Language (SAML) to implement discretionary security
- D. Create all user accounts in an LDAP server, and make it the default realm for the domain
- E. Define a custom security proxy that stores and propagates each authenticated user's credential information

Answer: A

Question : 9

Within a Service-Oriented Architecture, which of the following is NOT specified by a Service Policy?

- A. Encryption rules
- B. Execution Rules

- C. Versioning Rules
- D. Authorization rules
- E. Authentication rules

Answer: B

Question : 10

Which statement best describes the way in which Web Logic Workshop can be used to develop applications following the MVC pattern?

- A. Create EJBs and JSPs. Call EJBs from Servlets.
- B. Web Logic Workshop doesn't use the MVC model.
- C. Create a Struts Action from and associate it with the appropriate action mapping definition
- D. Create a serializable javaBean THAT DEFINES THE STATEFUL FIELDS AND THEIR METHODS AND PASSES THE DATA BETWEEN THE MODEL INVOCATION AND VIEW ELEMENTS
- E. Create an action from that defines the stateful fields and their accessor/mutator methods. Scope the form to a PageFlow and pass the state to controls, and call from the view as necessary.

Answer: E

Question : 11

Your application requirements include accessing a legacy mainframe application with native communication protocols. The legacy system must be accessible from J2EE and Net servers. To do this most effectively, you would use a product based on which specification?

- A. J2CA
- B. JDBC
- C. RMI/IIOP
- D. Web Services
- E. Java to CORBA bridge

Answer: D

Question : 12

Within a Service -Oriented Architecture, service version are bound to consumer through the;

- A. UDDI Server
- B. Service Policy
- C. Connectivity Layer
- D. Services Directory
- E. Orchestration Layer

Answer: B

Question : 13

When considering distributed transactions and the two phase commit protocol which of the following statements is NOT true?

- A. Web Logic SERVER DOES NOT SUPPORT NESTED TRANSACTIONS
- B. Web Logic SERVER ALLOWS TRANSACTIONS TO BE terminated only by the client that created the transaction
- C. Recovering transactions for a failed Web Logic server instance requires a Web Logic cluster configuration

SAMPLE EXAM

Pass4sure \$89 Lifetime Membership Features;

- Pass4sure \$89 Lifetime Membership includes Over **2100** Exams in One Price.
- **All** Pass4sure **Questions and Answers** are included in \$89 package.
- **All** Pass4sure audio exams are included **free** in \$89 package (See List).
- **All** Pass4sure study guides are included **free** in \$89 package (See List).
- **Lifetime** login access, no hidden fee, no login expiry.
- **Free updates** for Lifetime.
- **Free Download Access** to All new exams added in future.
- Accurate answers with **explanations** (If applicable).
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions, Answers and Study Guides are downloadable in **PDF** format.
- Audio Exams are downloadable in **MP3** format.
- **No authorization** code required to open exam.
- **Portable** anywhere.
- 100% success **Guarantee**.
- **Fast**, helpful support **24x7**.
