

E20-597

EMC

Backup and Recovery Specialist Exam for Storage Administrators

Thousands of IT Professionals before you have already passed their E20-597 certification exams using the EMC E20-597 Practice Exam from ipass4sure.com. Once you start using our E20-597 exam questions you simply can't stop! You are guaranteed to pass your EMC E20-597 test with ease and in your first attempt.

Here's what you can expect from the [ipass4sure](http://ipass4sure.com) EMC E20-597 course:

- * Up-to-Date EMC E20-597 questions designed to familiarize you with the real exam.
- * 100% correct EMC E20-597 answers you simply can't find in other E20-597 courses.
- * All of our tests are easy to download. Your file will be saved as a E20-597 PDF.
- * EMC E20-597 brain dump free content featuring the real E20-597 test questions.

EMC E20-597 Certification Exam is of core importance both in your Professional life and EMC Certification Path. With EMC Certification you can get a good job easily in the market and get on your path for success. Professionals who passed EMC E20-597 Certification Exam are an absolute favorite in the industry. If you pass EMC E20-597 Certification Exam then career opportunities are open for you.

Our E20-597 Questions & Answers provide you an easy solution to your EMC E20-597 Exam Preparation. Our E20-597 Q&As contains the most updated EMC E20-597 real tests. You can use our E20-597 Q&As on any PC with most versions of Acrobat Reader and prepare the exam easily.

QUESTION 1

In a NetWorker backup environment, which process needs to be running on every NetWorker Server/Storage Node/Client?

- A. nsrjobd
- B. nsrmmd
- C. nsrexecd
- D. nsrd

Answer: C

QUESTION 2

A NetWorker backup environment consists of 2 NetWorker servers, 4 storage nodes and 50 clients. How many NetWorker data zones are there?

- A. 2
- B. 56
- C. 1
- D. 6

Answer: A

QUESTION 3

Which information is retained during a default uninstallation of NetWorker?

- A. All NetWorker configuration files
- B. Only the directory structure
- C. Only Client File Indexes and resource files
- D. Only NetWorker software source files

Answer: A

QUESTION 4

An autochanger has three (3) tape drives. The robotic arm and Drive 1 are connected to the NetWorker server. Drives 2 and 3 are connected to a storage node. Which autochanger topology is described?

- A. Shared
- B. Dedicated
- C. Dynamically shared
- D. Standalone

Answer: A

QUESTION 5

A NetWorker client uses the Default schedule and the Default group. On Wednesday afternoon the clients /export/home file system, which changes daily, is destroyed. How many save sets must be recovered to rebuild the file system?

- A. 2
- B. 6
- C. 4
- D. 1

Answer: C

QUESTION 6

NetWorker storage nodes A, B, and C share tape drives, drv1 and drv2, in an autochanger. If storage node A is writing to drv1 and storage node B is writing to drv2, what happens when C needs to write a save set?

- A. C aborts and must be restarted when a drive becomes available
- B. C waits for drv2 to become available
- C. C directs its save stream to storage node A
- D. C waits until either drv1 or drv2 becomes available

Answer: D

QUESTION 7

A NetWorker client has twelve save sets. Four of the save sets need to be backed up in the evening, four need to be backed up shortly after midnight, and four need to be backed up around noon. What step is part of the configuration process?

- A. Create pools for each of the three sets of save sets
- B. Create three client resources for the client
- C. Place the client resource in three groups, each starting at a different time
- D. Set the clients Parallelism attribute to 4

Answer: B

QUESTION 8

What is the impact of increasing a client's retention policy on newly created save sets?

- A. Increased time maintained in Client File Index
- B. Increased time protected from being automatically recycled
- C. Reduced time available for save set recoveries
- D. Increased time available for browsable recoveries

Answer: B

QUESTION 9

A NetWorker Server uses one autochanger with two tape drives. Storage Node A and Storage Node B also use the same autochanger for backups. What is the minimum number of Dynamic Drive Sharing licenses needed?

- A. 3
- B. 4
- C. 1
- D. 2

Answer: C

QUESTION 10

NetWorker clients A and B need to have a full backup performed at the same time every Sunday. What is the best way to implement this?

- A. Assign A and B to the same Storage Node
- B. Schedule a full backup on Sunday for each client in the NetWorker server
- C. Assign A and B to the same Media Pool
- D. Schedule a full backup on Sunday for a group that contains the two clients

Answer: D

QUESTION 11

What is the impact of having no host names listed in the `.../nsr/res/servers` file on the NetWorker client C1?

- A. Any NetWorker server is permitted to back up C1's data
- B. No back ups of C1's data are permitted
- C. Only the designated storage node can back up C1's data
- D. Only C1 can back up C1's data

Answer: A

QUESTION 12

When configuring a remote tape library in NetWorker, what must you do before running `jbconfig`?

- A. Verify the user running `jbconfig` is in the Administrator list
- B. Perform an inventory of the volumes in the tape library
- C. Run `inquire` to create the device path names
- D. Configure a storage node resource for the remote storage node

Answer: A
