CheckPoint

Check Point Certified Managed Security Expert NGX

Thousands of IT Professionals before you have already passed their 156-815 certification exams using the CheckPoint 156-815 Practice Exam from ipass4sure.com. Once you start using our 156-815 exam questions you simply can't stop! You are guaranteed to pass your CheckPoint 156-815 test with ease and in your first attempt.

Here's what you can expect from the [ipass4sure](http://ipass4sure.com) CheckPoint 156-815 course:

- * Up-to-Date CheckPoint 156-815 questions designed to familiarize you with the real exam.
- * 100% correct CheckPoint 156-815 answers you simply can't find in other 156-815 courses.
- * All of our tests are easy to download. Your file will be saved as a 156-815 PDF.
- * CheckPoint 156-815 brain dump free content featuring the real 156-815 test questions.

CheckPoint 156-815 Certification Exam is of core importance both in your Professional life and CheckPoint Certification Path. With CheckPoint Certification you can get a good job easily in the market and get on your path for success. Professionals who passed CheckPoint 156-815 Certification Exam are an absolute favorite in the industry. If you pass CheckPoint 156-815 Certification Exam then career opportunities are open for you.

Our 156-815 Questions & Answers provide you an easy solution to your CheckPoint 156-815 Exam Preparation. Our 156-815 Q&As contains the most updated CheckPoint 156-815 real tests. You can use our 156-815 Q&As on any PC with most versions of Acrobat Reader and prepare the exam easily.

Question: 1

To configure for CMA redundancy, which of the following would be necessary?

- A. Multiple MDS Container machines
- B. The CMA High Availability option selected in the CMA properties window
- C. Multiple CMAs configured on a single MDS
- D. Multiple MDS Manager machines
- E. The CMA High Availability option selected in the Customer properties window

Answer: A

Question: 2

The MDS will initiate status collection from the CMAs when which of the following occurs?

- A. MDS-level High Availability is configured.
- B. CMA-level High Availability is configured.
- C. CMAs have established SIC with remote Security Gateways.
- D. Get Node Data action is requested for a specific object displayed in the SmartUpdate View.
- E. The MDG connects to the MDS Manager.

Answer: E

Question: 3

Which of the following actions occurs after the configuration of a CLM on an MDS MLM for a specific Customer?

- A. The CLM object appears in the MDG. The Administrator needs to launch a SmartDashboard for that CLM, and configure it to retrieve the logs from the CMA's Gateway.
- B. A default CLM object is created in the CMA Security Policy and is added to the list of log servers for each configured Security Gateway.
- C. No changes appear in the CMA Security Policy, but none are required. Once the CLM of a specific Customer is created, all logs are sent to that CLM by default. This is after the Policy is installed on the Gateway and the master's file is edited by the system.
- D. The system creates a default CLM object in the CMA Security Policy. The Administrator must then log in to the CMA and configure the Gateway to send all logs to the CLM, by including the CLM object in its list of log servers.
- E. The system performs no default configuration tasks. The Administrator must log into the CMA, create the CLM object, and add it to the Gateway's list of log servers.

Answer: D

Question: 4

The Rule Base shown below is installed on the NOC firewall at the MSP:

NO.	NAME	SOURCE	DESTINATION	VPN	SERVICE	ACTION	TRACK
1	Stealth Rule	* Any	NOC_Firewall	* Any Traffic	* Any	drop	Log
2	MDG-to-MDS Rule	MDG	MDS	* Any Traffic	TCP CPMI	accept	Log
3	CMAs-to-Security Gateways Rule	CMAs	Security Gateways	* Any Traffic	FireWall-1	accept	Log
4	Cleanup Rule	* Any	* Any	* Any Traffic	* Any	drop	Log

If the Administrator intended to install licenses on remote Security Gateways by using SmartUpdate, this Rule Base is incomplete. Which of the following additions would complete the Rule Base configuration?

- A. The MDS must be added to the Source column of the CMAs-to-Security Gateways Rule.
- B. Create a rule allowing the remote Gateways access to the MDS.
- C. Create a rule that allows the remote Gateways access to the CMAs.
- D. Create a rule allowing the Primary and Secondary MDS machines located at the NOC to connect to each other.
- E. Create a rule allowing the remote Gateways access to the NOC firewall.

Answer: A

Question: 5

What is the function of a CLM?

- A. Performs system backups of the Primary and Secondary MDS machines.
- B. Regulates ConnectControl traffic from the NOC to remote Gateways.
- C. Serves as a backup CMA for CMA-level High Availability.
- D. Protects the Provider-1 system from a network attack.
- E. Collects log data for managed Security Gateways.

Answer: E

Question: 6

A Managed Service Provider (MSP) is using Provider-1 to manage their customer's security policies. What is the recommended method of securing the Provider-1 system in a NOC environment?

- A. The Provider-1 software does not include an integrated firewall to protect the Provider-1 system. It is recommended to use a separate firewall to secure the Provider-1 environment, managed by the NOC Security Administrator and the Provider-1 / MSP Administrator.
- B. The Provider-1 software includes an integrated firewall to protect the Provider-1 system. It is recommended to use the included firewall to secure the Provider-1 environment, managed by the NOC Security Administrator.
- C. The Provider-1 software includes an integrated firewall to protect the Provider-1 system. It is recommended to use the included firewall to secure the Provider-1 environment, managed by the Provider-1 / MSP Administrator.
- D. The Provider-1 software does not include an integrated firewall to protect the Provider-1 system. It is recommended to use a separate firewall to secure the Provider-1 environment, managed by the NOC Security Administrator.
- E. The Provider-1 software does not include an integrated firewall to protect the Provider-1 system. It is recommended to use a separate firewall to secure the Provider-1 environment, managed by the Provider-1 / MSP Administrator.

Answer: D

Question: 7

The Eventia Reporter Add-on for Provider-1 does not have its own package. It is installed, removed, enabled, and disabled using which of the following scripts?

- A. SVRSetup
- B. sysconfig
- C. cpconfig
- D. SetupUtil
