

643-531

Cisco

Cisco Secure Intrusion Detection Systems

Thousands of IT Professionals before you have already passed their 643-531 certification exams using the Cisco 643-531 Practice Exam from ipass4sure.com. Once you start using our 643-531 exam questions you simply can't stop! You are guaranteed to pass your Cisco 643-531 test with ease and in your first attempt.

Here's what you can expect from the [ipass4sure](http://ipass4sure.com) Cisco 643-531 course:

- * Up-to-Date Cisco 643-531 questions designed to familiarize you with the real exam.
- * 100% correct Cisco 643-531 answers you simply can't find in other 643-531 courses.
- * All of our tests are easy to download. Your file will be saved as a 643-531 PDF.
- * Cisco 643-531 brain dump free content featuring the real 643-531 test questions.

Cisco 643-531 Certification Exam is of core importance both in your Professional life and Cisco Certification Path. With Cisco Certification you can get a good job easily in the market and get on your path for success. Professionals who passed Cisco 643-531 Certification Exam are an absolute favorite in the industry. If you pass Cisco 643-531 Certification Exam then career opportunities are open for you.

Our 643-531 Questions & Answers provide you an easy solution to your Cisco 643-531 Exam Preparation. Our 643-531 Q&As contains the most updated Cisco 643-531 real tests. You can use our 643-531 Q&As on any PC with most versions of Acrobat Reader and prepare the exam easily.

Note:

Section A contains 58 questions

Section B contains 80 questions.

The total numbers of questions is 138

Each section starts with Question NO 1.

Section A**QUESTION NO: 1**

Which statement is true regarding the IDS Sensor communications?

- A. RDEP uses SSL for secured internal communications.
- B. RDEP uses SSH for secure external communications.
- C. PostOffice protocol uses IPSec for secured external communications.
- D. IDAPI uses HTTPS for secured internal communications.
- E. cidCU uses SSH for secured external communications.

Answer: A

Explanation:

Data Acquisition

The Cisco IDS **RDEP** Info Mediator acquires data from the **RDEP** server across a secure TCP link using SSL. This data is held in IDIOM XML format (Cisco's XML format). The Cisco IDS **RDEP** Info Mediator parses the data into events and sends them to the Cisco Info Server.

B RDEP does not use SSH for external communications

C PostOffice protocol does not encrypt

PostOffice Features

The **PostOffice protocol** provides a critical communication link between your Director platform and your IDS sensors. Being the primary method of communication, the **PostOffice protocol** must support certain necessary functionality:

- Reliability
- Redundancy
- Fault tolerance

D IDAPI I COULDN'T FIND ANYTHING ABOUT IDAPI AND HTTPS

E and nothing for E

QUESTION NO: 2

What is the purpose of the PuTTYgen utility in IDS MC?

- A. Generates SSL certificates for IDS Sensors.
- B. Generates SSH public and private keys for IDS Sensors.
- C. Generates SSH public and private keys for IDS MC server.
- D. Generates shared secret keys for IDS Sensors and IDS MC server.
- E. Generates SSL keys for administrative client access to IDS MC server.

Answer: C

Explanation:

To use SSH keys in IDS MC or Security Monitor, follow these steps:

Step 1 To use SSH keys in IDS MC or Security Monitor for Windows 2000, follow these steps:

- a. Use PuttyGen to generate your keys. Instructions are available at <http://www.chiark.greenend.org.uk/~sgtatham/putty/docs.html> .
- b. Copy the public key to the sensor's ~/.ssh/authorized_keys file.
- c. Save the private key. We recommend the name sensorname.key for the private key and we use it in this example.

QUESTION NO: 3

Exhibit:

Refer to the exhibit. Server TestKing 4 is in VLAN 8. The Catalyst 6500 is running Catalyst OS. Which command represents a valid configuration step to permit the ISDM2 to monitor traffic sent to and from VLAN3, VLAN4, and VLAN5?

Leading the way in IT testing and certification tools, www.testking.com

- A. 6500(config)# **monitor session 1 source vlan 3, 4, 5**
- B. 6500(config)# **monitor session 1 source 3-5 both**
- C. 6500(config)# **monitor session 1 destination idsm**
- D. 6500>(enable) **set span 3 –5 8/1 both**
- E. 6500>(enable) **set span source vlan-list 3 – 5 destination interface 8/1 both create**

Answer: A

Explanation:

Switch(config)# **monitor session** {session_number} {**source** {**interface** type/num} | {**vlan** vlan_ID}} [, | - | **rx** | **tx** | **both**]

Specifies the SPAN session number (1 through 6), the source interfaces (FastEthernet or GigabitEthernet), or VLANs (1 through 1005), and the traffic direction to be monitored.

Reference:

[Configuring SPAN](#)

QUESTION NO: 4

Match the most appropriate filtering method to the capture configuration that restricts the VLANs monitored on a trunk port. Use each option only once.

Clear trunk and set trunk commands	place here
filter keyword in set rspan command	place here
allow vlan keyword in switchport capture command	place here
filter keyword in monitor session command	place here

Use these

Catalyst OS using remote SPAN	Catalyst IOS using remote SPAN
Catalyst OS using VACLs	Catalyst IOS using mls ip ids

Answer:

Clear trunk and set trunk commands	Catalyst OS using VACLs
filter keyword in set rspan command	Catalyst OS using remote SPAN
allow vlan keyword in switchport capture command	Catalyst IOS using remote SPAN
filter keyword in monitor session command	Catalyst IOS using mls ip ids

Comment:

Clear trunk and set trunk commands -----> [Catalyst OS using VACLs]

filter keyword in set rspan command ---> [Catalyst OS using remote SPAN]

allow vlan keyword in switchport capture command -----> [Catalyst IOS using remote SPAN]

http://www.cisco.com/univercd/cc/td/doc/product/lan/cat6000/12_1e/swconfig/span.pdf

Section : Local SPAN and RSPAN Guidelines and Restrictions

filter keyword in monitor session command -----> [Catalyst IOS using mls ip ids]

Refer to :http://psyber.letifer.org/downloads/priv/cisco_switch_commands.pdf

QUESTION NO: 5

Which type of signature engine is characterized by single packet conditions?

- A. other
- B. string
- C. atomic
- D. traffic

Answer: C**Signature Structure**

As previously discussed, signature implementations deal with packet headers and packet payloads. The structure of the signatures deals with the number of packets that must be examined to trigger an alarm. Two types of signature structures exist and these are as follows:

- Atomic
- Composite

Atomic Structure

Some attacks can be detected by matching IP header information (context based) or string information contained in a single IP packet (content based). **Any signatures that can be matched with a single packet fall into the atomic category.** Because atomic signatures examine individual packets, there's no need to collect or store state information.

An example of an atomic signature is the SYN-FIN signature (signature ID 3041).

This signature looks for packets that have both the SYN and FIN flags set. The *SYN flag* indicates this is a packet attempting to begin a new connection. The *FIN flag* indicates this packet is attempting to close an existing connection. These two flags shouldn't be

SAMPLE EXAM

Pass4sure \$89 Lifetime Membership Features;

- Pass4sure \$89 Lifetime Membership includes Over **2100** Exams in One Price.
- **All** Pass4sure **Questions and Answers** are included in \$89 package.
- **All** Pass4sure audio exams are included **free** in \$89 package (See List).
- **All** Pass4sure study guides are included **free** in \$89 package (See List).
- **Lifetime** login access, no hidden fee, no login expiry.
- **Free updates** for Lifetime.
- **Free Download Access** to All new exams added in future.
- Accurate answers with **explanations** (If applicable).
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions, Answers and Study Guides are downloadable in **PDF** format.
- Audio Exams are downloadable in **MP3** format.
- **No authorization** code required to open exam.
- **Portable** anywhere.
- 100% success **Guarantee**.
- **Fast**, helpful support **24x7**.
