Here's what you can expect from the [ipass4sure](http://ipass4sure.com) Citrix 1Y0-327 course:

- * Up-to-Date Citrix 1Y0-327 questions designed to familiarize you with the real exam.
- * 100% correct Citrix 1Y0-327 answers you simply can't find in other 1Y0-327 courses.
- * All of our tests are easy to download. Your file will be saved as a 1Y0-327 PDF.
- * Citrix 1Y0-327 brain dump free content featuring the real 1Y0-327 test questions.

Citrix 1Y0-327 Certification Exam is of core importance both in your Professional life and Citrix Certification Path. With Citrix Certification you can get a good job easily in the market and get on your path for success. Professionals who passed Citrix 1Y0-327 Certification Exam are an absolute favorite in the industry. If you pass Citrix 1Y0-327 Certification Exam then career opportunities are open for you.

Our 1Y0-327 Questions & Answers provide you an easy solution to your Citrix 1Y0-327 Exam Preparation. Our 1Y0-327 Q&As contains the most updated Citrix 1Y0-327 real tests. You can use our 1Y0-327 Q&As on any PC with most versions of Acrobat Reader and prepare the exam easily.

QUESTION 1

Which action can an administrator take to disable data integrity on a central store containing pre-existing data that is signed?

- A. Re-sign the data with the signing tool
- B. Unsign the data with the Data Integrity node in the console
- C. Use the CTXSIGNDATA -u command prompt
- D. Use the CTXUNSIGNDATA -u command prompt

Answer: C

QUESTION 2

You work as a network engineer at Certkiller .com. One of your administrators in an environment with multiple operating systems is considering the implementation of the Hot Desktop feature. On which two operating systems can the administrator install Hot Desktop? (Choose two.)

- A. Microsoft Windows NT 4.0
- B. Microsoft Windows XP Professional (64-bit)
- C. Microsoft Windows XP Embedded
- D. Microsoft Windows XP Professional (32-bit)

Answer: C,D

QUESTION 3

Which statement is true regarding the Password Manager Self-Service Registration Wizard?

- A. Each time the user starts his or her device, the wizard opens.
- B. The wizard provides a demonstration of the product.
- C. After a user enters the required enrollment information, the wizard will never appear again.
- D. If a user closes the wizard without entering any information, the wizard will appear when the agent software is restarted.

Answer: D

QUESTION 4

Which step is required after installing the agent software and why?

- A. Run the Microsoft installer package with the suppress option so that the graphical identification and authentication (GINA) DLL can be installed.
- B. Restart/refresh the device so that the graphical identification and authentication (GINA) DLL can be installed.
- C. Restart/refresh the device so that licensing parameters can be applied.

- D. Run the Microsoft installer package with the suppress option so that licensing parameters can be applied.
- E. Upgrade the central store, because otherwise you can only use previous versions of the agent software to work with the central store.

Answer: B

QUESTION 5

You work as a network engineer at Certkiller .com. One of your administrators has a .NET application where the Control IDs are not statically defined and each time the application launches, the Control IDs change. How should an administrator configure this application in a Password Manager 4.5 environment according to Citrix best practice?

- A. Define the application using Send Special Keys instead of Control IDs
- B. Enable Advanced Settings >> Use control ordinal numbers
- C. Create a special Application Action Extension for the application
- D. Enable application auto-detection within a user configuration

Answer: B

QUESTION 6

You work as a network engineer at Certkiller .com. One of your administrators wants to install and configure the Password Manager Service. The configuration requires a Server Certificate from the company Certificate Authority, which is a server in the same domain as the Password Manager Service server. The Administrator will also have to correctly install the certificate components in order to facilitate SSL communications between the Password Manager Service and its clients. What must be installed for the successful completion of the configuration?

- A. The Certificate Authority root certificate wherever a client of the Password Manager Service is installed
- B. The Certificate Authority root certificate as needed by the Password Manager Service Client
- C. A separate user certificate wherever a client of the Password Manager Service is installed
- D. The Server Certificate on the Certificate Authority machine

Answer: A

QUESTION 7

You work as a network engineer at Certkiller .com. One of your administrators created an application definition and wants to test the password change for the application. Everything is working until the administrator selects "Create Your Own Password" in the Password Change Wizard. The administrator types "111" and confirms the password. The application returns a message that the password is not accepted because a minimum of 8 characters, including letters and numbers is required. Which two steps can an

1Y0-327

administrator complete in order to solve this problem? (Choose two.)

- A. Verify that the password policy for this application requires 8 characters, including letters and numbers.
- B. Verify that a form definition for Failed Password Change was created and that this form requires 8 characters, including letters and numbers.
- C. Select choose a system-generated password in the Password Change Wizard when you test the password change function.
- D. Verify that the correct password policy was assigned to this application definition within the user configuration.

Answer: A,D

QUESTION 8

You work as a network engineer at Certkiller .com. One of your administrators in an environment with multiple operating systems is considering the implementation of the Hot Desktop feature. On which two operating systems can the administrator install Hot Desktop? (Choose two.)

- A. Microsoft Windows NT 4.0
- B. Microsoft Windows XP Professional (64-bit)
- C. Microsoft Windows XP Professional (32-bit)
- D. Microsoft Windows XP Embedded

Answer: C,D

QUESTION 9

Which user account requires rights and privileges to manage communication among the central store, automatic key recovery, and the Self-Service module?

- A. Self-Service
- B. Data proxy
- C. Automatic key recovery
- D. XTE Service

Answer: B

QUESTION 10

In Certkiller .com, 15 laptops are used by the remote workforce for field work. Password Manager is installed and named user licensing is implemented on the laptops. One laptop is currently missing and its named user license is checked out. Which statement is true regarding the process for checking in the named user license of the missing laptop?

- A. The administrator will need to restart the license server or restart the Citrix Licensing Service.
- B. The administrator will need to use the LMCONFIG -r command on the license server
