Citrix

Citrix Presentation Server 4.0: Administration

Thousands of IT Professionals before you have already passed their 1Y0-256 certification exams using the Citrix 1Y0-256 Practice Exam from ipass4sure.com. Once you start using our 1Y0-256 exam questions you simply can't stop! You are guaranteed to pass your Citrix 1Y0-256 test with ease and in your first attempt.

Here's what you can expect from the [ipass4sure](http://ipass4sure.com) Citrix 1Y0-256 course:

- * Up-to-Date Citrix 1Y0-256 questions designed to familiarize you with the real exam.
- * 100% correct Citrix 1Y0-256 answers you simply can't find in other 1Y0-256 courses.
- * All of our tests are easy to download. Your file will be saved as a 1Y0-256 PDF.
- * Citrix 1Y0-256 brain dump free content featuring the real 1Y0-256 test questions.

Citrix 1Y0-256 Certification Exam is of core importance both in your Professional life and Citrix Certification Path. With Citrix Certification you can get a good job easily in the market and get on your path for success. Professionals who passed Citrix 1Y0-256 Certification Exam are an absolute favorite in the industry. If you pass Citrix 1Y0-256 Certification Exam then career opportunities are open for you.

Our 1Y0-256 Questions & Answers provide you an easy solution to your Citrix 1Y0-256 Exam Preparation. Our 1Y0-256 Q&As contains the most updated Citrix 1Y0-256 real tests. You can use our 1Y0-256 Q&As on any PC with most versions of Acrobat Reader and prepare the exam easily.

Question: 1

Scenario: John, a Citrix administrator, needs to enable the synchronization of PDA devices for both local and remote users. Users will connect from the LAN to the Web Interface. Which two options allow John to accomplish this? (Choose two)

- A. In the Microsoft Management Console, John can add the Device Manager snap-in.
- B. The Presentation Server Console, John can enable the automatic sharing of PDA devices in server properties.
- C. In the Presentation Server Console, John can create a policy under properties and enable the policy rule "Turn on automatic virtual COM port mapping".
- D. In the Access Suite Console, John can create a MetaFrame Presentation Server site, select Manage Client Connection settings and enable the PDA settings.

Answer: C, D

Question: 2

Scenario: You created a policy for the Human Resources group which restricts the users in that group from accessing local drives. Human Resources has recently added five new recruiters to the team who will travel to universities throughout the country to recruit candidates. While on these trips the recruiters will need to save data to their laptops and upload information nightly to the database which is published and load-balanced across all servers in the farm. You create a new policy for the recruiters called "HR recruitment" and disable the rule which restricts the access to the client drives.

Which two filter types should be applied to the "HR recruitment" policy to exclude the recruiters from the client drive mapping? (Choose two)

- A. Server
- B. Location
- C. Client names
- D. Users and user groups
- E. Connections made through controlled access

Answer: C, D

Question 3

Scenario: You created several policies and configured filters for them in the Presentation Server Console. You now wish to verify the enforcement of these policies on specific user accounts in your enterprise. How can you view the effective Citrix policies for these user accounts?

- A. Filter the policies by user on the Policy Management Console.
- B. From the client device execute the GPRESULT application.
- C. In the Presentation Server Console, select Tools, Wizards, Effective Policy Wizard.
- D. In the Presentation Server Console, execute the search function focused on the target user accounts and click "View Resultant Policy".

Answer: D

Question 4

Scenario: You created a policy for the Human Resources group called "HR standard" which restricts the users in that group from accessing local drives. Human Resources has recently added five new recruiters to the team who will travel to universities throughout the country to recruit candidates. While on these trips the recruiters will need to save data on their laptops and upload information nightly to the database which is published on a Presentation Server. You

create a new policy for the recruiters called "HR recruitment" and disable the rule which restricts the access to the client drives.

Which two steps are required to ensure that the recruiters are able to access their local drives? (Choose two)

- A. Rank the "HR recruitment" policy higher than the "HR standard" policy.
- B. Rank the "HR standard" policy higher than the "HR recruitment" policy.
- C. Filter the "HR standard" policy by users, specify the five recruiter accounts and allow access.
- D. Filter the "HR recruitment" policy by users, specify the five recruiter accounts and allow access.

Answer: A, D

Question 5

Through which three management tools or utilities can shadowing be enabled for users of Presentation Server? (Choose three)

- A. Access Suite Console
- B. Presentation Server Console
- C. Presentation Server Installation
- D. Citrix Connection Configuration Utility
- E. Web Interface Administration Console

Answer: B, C, D

Question 6

Scenario: A production company has Presentation Server enabled for local and remote users. All users to the "Production" user group. In addition, a remote user group is configured. Several proprietary applications, which are critical to the organization's business, require audio. Remote users complain of degraded performance for these applications. The administrator limits the audio bandwidth for the remote users through a policy called Remote Audio. An additional policy, Production Audio, is configured for the entire Production group, which optimizes the audio for all employees in that group.

To ensure that the "Remote Audio" policy is applied to remote user sessions only, which policy should be ranked highest?

- A. Default user
- B. SpeedScreen
- C. Remote Audio
- D. Production Audio

Answer: C

Question: 7

What is the purpose of the local host cache?

- A. It handles queries regarding server load values locally from application.
- B. It ensures that pertinent data is accessible locally even if the data store database is unavailable.
- C. It provides data about the local server to the Presentation Server Console over a TCP connection.
- D. It stores server load, active session and disconnected session information locally for Presentation Server.

Answer: B

Question: 8

Which three types of persistent data are contained in the Presentation Server farm data store?
(Choose three)

- A. License files
- B. User profiles
- C. Printer drivers and mappings
- D. Published application configurations
- E. Presentation Server administrator accounts

Answer: C, D, E

Question: 9

What is contained in the data store database?

- A. User profiles for all servers in a given zone.
- B. Dynamic data for all servers in a given zone.
- C. License files for all servers in a given server farm.
- D. Persistent data for all servers in a given server farm.

Answer: D

Question: 10

Which component manages the servers running Presentation by integrating with third-party management consoles such as HP OpenView?

- A. Load Manager
- B. Network Manager
- C. Resource Manager
- D. Installation Manager

Answer: B

Question: 11

In the Presentation Server Console, what is a requirement for deploying a package using the Project Wizard?

- A. Project Wizard requires network share point on the file server.
- B. The administrator must have write access to the network share point to deploy a package using the Project Wizard.
- C. Only packages 500MB or smaller can be used to deploy a package using Project Wizard to a local drive or a network drive.
- D. Project Wizard and Active Directory must be used to deploy the packages to all the servers and a network share point is not required.

Answer: A

Question: 12

Scenarios: You created a new ADF package using Installation Manager Packager. You want to keep the recorded application on the packager server permanently.

Within the packager, which action is appropriate?
