

250-265

Symantec

*Data Protection Administration for UNIX using NetBackup
6.5*

Thousands of IT Professionals before you have already passed their 250-265 certification exams using the Symantec 250-265 Practice Exam from ipass4sure.com. Once you start using our 250-265 exam questions you simply can't stop! You are guaranteed to pass your Symantec 250-265 test with ease and in your first attempt.

Here's what you can expect from the ipass4sure Symantec 250-265 course:

- * Up-to-Date Symantec 250-265 questions designed to familiarize you with the real exam.
- * 100% correct Symantec 250-265 answers you simply can't find in other 250-265 courses.
- * All of our tests are easy to download. Your file will be saved as a 250-265 PDF.
- * Symantec 250-265 brain dump free content featuring the real 250-265 test questions.

Symantec 250-265 Certification Exam is of core importance both in your Professional life and Symantec Certification Path. With Symantec Certification you can get a good job easily in the market and get on your path for success. Professionals who passed Symantec 250-265 Certification Exam are an absolute favorite in the industry. If you pass Symantec 250-265 Certification Exam then career opportunities are open for you.

Our 250-265 Questions & Answers provide you an easy solution to your Symantec 250-265 Exam Preparation. Our 250-265 Q&As contains the most updated Symantec 250-265 real tests. You can use our 250-265 Q&As on any PC with most versions of Acrobat Reader and prepare the exam easily.

Question: 1

Which statement is true about the relationship between a master server and an EMM server?

- A. An EMM server supports only one master server.
- B. An EMM server supports more than one master server.
- C. A master server may use more than one EMM server.
- D. A master server may use an EMM server one major version behind.

Answer: B

Question: 2

Attempts to remotely install Net Backup client software on a new UNIX client fail. What are possible solutions for this problem? (Choose two.)

- A. Turn on universal access in the /etc/services file.
- B. Add the user MASTER_SERVER on the client.
- C. Enter the master server and root in the .rhosts file in the root directory.
- D. Type the master server's name and IP address in the client's hosts file.
- E. Update the /etc/inetd file on both machines.

Answer: C, D

Question: 3

What should you do after Net Backup media server is installed?

- A. Make sure you have restarted services on the EMM server.
- B. Make sure you have a server license key.
- C. Make sure you have enough disk space for the catalogs.
- D. Make sure you can communicate with the tape devices.

Answer: D

Question: 4

Which statements are true about installing multiple media servers? (Choose two.)

- A. All media server installations require a server license key.
- B. All media server installations must be pushed from the master server.
- C. All media server installations should be performed as root/administrator.
- D. All media server installations can be pushed from a media server with the same OS.
- E. All media server installations require a tape drive be configured on the system.

Answer: A, C

Question: 5

When installing Net Backup 6.5, which documents should be reviewed before installing the application? (Choose three.)

- A. Release Notes
- B. Hardware Compatibility Guide
- C. Hardware Supported List
- D. Operating System Compatibility Guide
- E. Operating System Supported List

Answer: A, B, D

Question: 6

Which component must be installed before you can complete the Net Backup installation on a master or media server?

- A. Net Backup Operations Manager (NOM)
- B. Authentication (AT)
- C. Private Branch Exchange (PBX)
- D. Authorization (AZ)

Answer: C

Question: 7

Consider the following:

A heavily-used file server must be configured as a NetBackup client.
The server is in production around-the-clock.
Backups must have little effect on client disk I/O and CPU.
The client data exists on SAN-attached disks.

Which NetBackup method would best fit this scenario?

- A. Raw partition
- B. Off-host backup
- C. Copy on write snapshot
- D. Mirror snapshot

Answer: B

Question: 8

Which statements are true about upgrading an existing NetBackup installation to NetBackup 6.5?
(Choose two.)

- A. All master and media servers must be on the same revision level.
- B. All clients must be on the same revision level as their media servers.
- C. A media server may be one major revision level lower than the master server.
- D. A client may be one major revision level lower than the master server.
- E. A master server may be one major revision level lower than a media server.

Answer: C, D

Question: 9

Which Symantec shared component is required for the installation of NetBackup Operations Manager?

- A. Symantec Private Authorization Service
- B. Symantec Private Authentication Service
- C. Symantec Product Authorization Service
- D. Symantec Product Authentication Service

Answer: D

Question: 10

In the NetBackup Administration console, where do you specify user administration permissions?

- A. Master Server Properties-->Security

- B. Master Server Properties-->Authentication
- C. Master Server Properties-->Permissions
- D. Master Server Properties-->Authorization

Answer: D

Question: 11

Which processes are found on a NetBackup UNIX client? (Choose three.)

- A. bpbkar
- B. bpbrm
- C. tar
- D. bpcompatd
- E. bpcd

Answer: A, C, E

Question: 12

What is the name of the Netbackup service running after installation of a Windows client?

- A. NetBackup Windows Service
- B. NetBackup Client Service
- C. NetBackup Remote Service
- D. NetBack File System Service

Answer: B

Question: 13

As part of a hot catalog backup, which NetBackup components are backed up? (Choose three.)

- A. EMM database
- B. Image database
- C. NOM database
- D. configuration files
- E. hosts file

Answer: A, B, D

Question: 14

After successfully installing three UNIX clients, all backups for those clients fail with Status Code 59: access to the client was not allowed. What should the system administrator do to resolve this problem?

- A. Reboot the UNIX clients.
- B. Restart the master server daemons.
- C. Verify that the media server is listed in the bp.conf file.
- D. Edit the .rhosts file on the client and add the master server name.

Answer: C

Question: 15

Which statements are true about legacy logging? (Choose three.)

- A. Legacy logs should always be enabled.
- B. Processes or services must be restarted to activate some legacy logging.
