

DP-002W

Veritas

Data Protection Implementation for Windows using NetBackup

Thousands of IT Professionals before you have already passed their DP-002W certification exams using the Veritas DP-002W Practice Exam from ipass4sure.com. Once you start using our DP-002W exam questions you simply can't stop! You are guaranteed to pass your Veritas DP-002W test with ease and in your first attempt.

Here's what you can expect from the [ipass4sure](http://ipass4sure.com) Veritas DP-002W course:

- * Up-to-Date Veritas DP-002W questions designed to familiarize you with the real exam.
- * 100% correct Veritas DP-002W answers you simply can't find in other DP-002W courses.
- * All of our tests are easy to download. Your file will be saved as a DP-002W PDF.
- * Veritas DP-002W brain dump free content featuring the real DP-002W test questions.

Veritas DP-002W Certification Exam is of core importance both in your Professional life and Veritas Certification Path. With Veritas Certification you can get a good job easily in the market and get on your path for success. Professionals who passed Veritas DP-002W Certification Exam are an absolute favorite in the industry. If you pass Veritas DP-002W Certification Exam then career opportunities are open for you.

Our DP-002W Questions & Answers provide you an easy solution to your Veritas DP-002W Exam Preparation. Our DP-002W Q&As contains the most updated Veritas DP-002W real tests. You can use our DP-002W Q&As on any PC with most versions of Acrobat Reader and prepare the exam easily.

Question: 1

You have an MSSQL database that you need to add to your environment. Which three items do you need to know before backups can be configured? (Choose three.)

- A. the version of MSSQL being used
- B. the kind of authentication being used
- C. the directories in which the database files are located
- D. the backup retentions needed by the DBA

Answer: A, B, D

Question: 2

You are currently assigned to conduct a NetBackup assessment for a Storage Area Network environment. The system administrator wants to know how to verify that the Fibre Channel switches are supported by VERITAS. Which two tasks can be done to determine if VERITAS supports the switches? (Choose two.)

- A. review the SNIA Certification List
- B. review the Compatibility Matrix Guide
- C. review the Media Manager Device Configuration Guide
- D. ask the system administrator which types of switches they are using

Answer: A, B

Question: 3

In preparation for a master server upgrade, you want to launch a backup of the NetBackup catalog. Which two methods accomplish this? (Choose two.)

- A. in the GUI, right-click your configured catalog backup policy, and select "Manual Backup"
- B. in the GUI, right-click on "Catalog" and select "Backup NetBackup Catalog "
- C. from the command line, run "bpbbackup" with appropriate switches
- D. from the command line, run "bpbbackupdb" with appropriate switches

Answer: B, D

Question: 4

Which three methods can be used to ensure that your NetBackup catalog has been backed up? (Choose three.)

- A. in the GUI, right-click on "Catalog" and select "Configure NetBackup Catalog Backup"
- B. individually run "bprecover -1" against your catalog images (tape or disk)
- C. in the GUI, right-click on "Catalog" and select "Verify NetBackup Catalog Recoverability"
- D. in the GUI, check the "Activity Monitor" for catalog backup results

Answer: A, B, D

Question: 5

You need to add a number of Windows servers from another department to your NetBackup Windows 2003 master server. The system administrator for these systems has given you a Domain Administrator account and permission to install the client, but he will not be available to help you. He has not given you access to the computer room where the systems are physically located. What is the supported method for installing the client?

- A. A share the installation CD on the network, log into the systems through a "Remote Terminal"

--	--	--

- session, map the CD and run setup.exe
- B. from the Administration client on the master server, select all the remote clients in "Host Properties", right-click and select "Client Install"
 - C. log in to any system on the domain as the domain administrator, run Launch.exe on the install CD and installation to network clients
 - D. remote installation is not allowed; the system administrator will have to give you physical access to the new clients

Answer: C

Question: 6

Your company has a single master/media server. You have just updated the NetBackup master server with the latest patch. Now all the hot Oracle database backups fail. What should you do?

- A. patch Oracle Agents on all Oracle clients
- B. reboot the master server after installing the patch
- C. install the latest Oracle Agents patch on the master server
- D. reboot the Oracle clients after installing the patch on the master server

Answer: B

Question: 7

Which two statements are true about installing multiple media servers? (Choose two.)

- A. A server license key must be installed on each media server
- B. All media server installations must be pushed from the master server
- C. All media server installations should be performed as root/administrator
- D. All media server installations can be pushed from a media server with the same OS

Answer: A, C

Question: 8

Which two steps are required during the initial installation of a NetBackup master server? (Choose two.)

- A. create volume pools
- B. define storage units
- C. setup policy schedules
- D. enter the server license
- E. specify the NetBackup server type

Answer: D, E

Question: 9

Which directory path on the client can the client's patch level be determined?

- A. <Install_path>\Volmgr\Bin\Patch
- B. <Install_path>\Patch
- C. <Install_path>\Volmgr\Bin\Version
- D. <Install_path>\Version

Answer: B

Question: 10

Which two statements are true about a media server upgrade installation from version 4.5 to version 5.0? (Choose two.)

- A. All clients must be on 50 if their media server is on 50
- B. All master and media servers must be on NetBackup 5.0
- C. The media servers must be on 4.5 or 50 if the clients are on 4.5
- D. The master server can be upgraded to 5.0, and media servers can remain at 4.5

Answer: C, D

Question: 11

What is required for Shared Storage Option installation?

- A. Fibre Channel connections for all tape devices to be shared
- B. a robot SCSI connection to all participating NetBackup media servers
- C. 1-gigabit Ethernet communication between all participating NetBackup servers
- D. A SSO license key on the NetBackup master server and on all participating NetBackup media servers

Answer: D

Question: 12

Which two methods determine the patch level of a client? (Choose two.)

- A. Run the support script in the goodies directory on the master server
- B. Select Help > About from the backup, Archive, and Restore interface on the client
- C. Select Help > About from the NetBackup Administration Console on the media server
- D. Select Help > About from the NetBackup Administration Console on the master server

Answer: A, B

Question: 13

A moderately used database server must be configured as a NetBackup client. The database application is custom built and is not covered by a NetBackup database agent. Backups must be performed quickly and open files need to be backed up. In addition, the ability to restore individual files from backup is required. Which of the following backup methods would best fit this scenario?

- A. Copy-on-write snapshot
- B. Mirror snapshot
- C. Flash backup
- D. True Image Restore enabled backup

Answer: C

Question: 14

The master server host properties option "Free Browse" in the "General" tab will allow _____.

- A. accounts without local Administrator privileges on the master server to view NetBackup configuration settings
- B. any NetBackup client to view NetBackup configuration settings
- C. designated NetBackup clients to view images from scheduled backups
