

250-521

Symantec

Design of Data Protection Solutions for Windows (NBU 5.0)

Thousands of IT Professionals before you have already passed their 250-521 certification exams using the Symantec 250-521 Practice Exam from ipass4sure.com. Once you start using our 250-521 exam questions you simply can't stop! You are guaranteed to pass your Symantec 250-521 test with ease and in your first attempt.

Here's what you can expect from the [ipass4sure](http://ipass4sure.com) Symantec 250-521 course:

- * Up-to-Date Symantec 250-521 questions designed to familiarize you with the real exam.
- * 100% correct Symantec 250-521 answers you simply can't find in other 250-521 courses.
- * All of our tests are easy to download. Your file will be saved as a 250-521 PDF.
- * Symantec 250-521 brain dump free content featuring the real 250-521 test questions.

Symantec 250-521 Certification Exam is of core importance both in your Professional life and Symantec Certification Path. With Symantec Certification you can get a good job easily in the market and get on your path for success. Professionals who passed Symantec 250-521 Certification Exam are an absolute favorite in the industry. If you pass Symantec 250-521 Certification Exam then career opportunities are open for you.

Our 250-521 Questions & Answers provide you an easy solution to your Symantec 250-521 Exam Preparation. Our 250-521 Q&As contains the most updated Symantec 250-521 real tests. You can use our 250-521 Q&As on any PC with most versions of Acrobat Reader and prepare the exam easily.

Exam Name:	Design of Data Protection Solutions for Windows (NBU 5.0)		
Exam Type:	Symantec		
Exam Code:	250-521	Total Question	105

Question: 1

A system administrator has communicated an interest in using the Net Backup Flash Backup feature of the Advanced Client. What key technical information must you gather in order to know whether this feature would be appropriate?

- A. Number of files on the file system
- B. Frequency of backups needed
- C. Density of the tapes being used for backups
- D. Age of the files on the file system

Answer: A

Question: 2

Your environment consists of several Net Backup 5.0 domains as well as Backup Exec 9.1 and 8.6 servers. You want to monitor all backup operations from a single console. Which product will allow this?

- A. Data Lifecycle Manager
- B. Remote Administration Console
- C. Global Data Manager
- D. Advanced Reporter

Answer: C

Question: 3

You must design a data protection solution for a large number of Windows 2003 servers configured as Net Backup clients. Security is a high priority. Which two items must be protected in order to preserve security configurations in the event of a disaster? (Choose two)

- A. Active Directory
- B. DHCP servers
- C. Routing servers
- D. Certificate servers

Answer: A, D

Question: 4

What are three factors to consider when planning a highly available Net Backup environment? (Choose three.)

- A. Is there more than one switch in your network environment?
- B. How many people are being cross-trained as Net Backup Administrators?
- C. Is the master server in a supported high availability configuration?
- D. Is there more than one backup window per night?

Answer: A, B, C

Question: 5

What effect does a multiplex backup have on the restore time of a single file?

- A. Increases file seek time on tape
- B. Decreases catalog overhead
- C. Increases multithreading overhead
- D. Decreases tape mount time

Exam Name:	Design of Data Protection Solutions for Windows (NBU 5.0)		
Exam Type:	Symantec		
Exam Code:	250-521	Total Question	105

Answer: A

Question: 6

You are determining the scope of a data protection solution. You have already analyzed preferences and deadlines. Which two other items must be analyzed before you can provide a solution? (Choose two.)

- A. Information in the SLA
- B. Network infrastructure
- C. Number of employees
- D. Number of tapes purchased

Answer: A, B

Question: 7

You want to evaluate an environment for a Net Backup 5.0 implementation. You are already aware of which servers will be the master and media servers and which agents will be used. What else do you determine in order to provide the proper installation requirements for Net Backup?

- A. Is Name Resolution functioning properly?
- B. Is every client present in the master server hosts file?
- C. Is the root partition on the master server mirrored?
- D. Is mySQL installed?

Answer: A

Question: 8

Which three items are considered in a Data Protection design? (Choose three.)

- A. Company hardware standards
- B. The type of cabling used for networks and SAN
- C. Data throughput speeds over networks and SAN
- D. Business requirements for recovery point and time

Answer: A, C, D

Question: 9

When determining the required backup performance of a Data Protection design, which three items should be determined? (Choose three.)

- A. Media server backup performance
- B. Network and SAN data rates
- C. Capacity of tape media
- D. Client backup windows

Answer: A, B, D

Question: 10

Which three items are optional considerations in a Data Protection design? (Choose three.)

- A. Using supported server platforms
- B. Using agents for databases
- C. Using mirror snapshots for backups
- D. Using a private backup network
