Case Study# 1

Corporate Information

Angel Services is a charity aid hospital which provides free medical assistance. Its head office resides in Chicago. There are 50 employees and 100 volunteers in this hospital. Volunteers travel to local community centers to provide free medical checkup and treatment.

Existing Environment

Existing Licensing Solution

All the existing software and hardware of this hospital come from donation of the public.

Existing IT Environment

There is a single IT administrator in Angel Services. Each employee is configured with a desktop computer. Different versions of Microsoft Windows and Microsoft Office are installed on their computers. It has a single IT administrator while there is no server in the network. The employees use public e-mail services. There is no computers provided for patient use.

Business Goals

Angel Services aims to achieve the following business goals:

- Standardize all desktop applications
- Reduce licensing costs to the least.
- Implement an internal e-mail solution
- If server failure occurs, provide redundancy
- Reduce the cost of troubleshooting desktops to the least.

In order to protect the perimeter network from external attacks, provide a security solution. Permit all employees to access a third-party application that requires Microsoft SQL Server
