If you pass HP HP0-757 Certification Exam then career opportunities are open for you.

Our HP0-757 Questions & Answers provide you an easy solution to your HP HP0-757 Exam Preparation. Our HP0-757 Q&As contains the most updated HP HP0-757 real tests. You can use our HP0-757 Q&As on any PC with most versions of Acrobat Reader and prepare the exam easily.

QUESTION 1:

A school needs to deploy a 5300 series switch in a lab where students and faculty have physical access to the switch. If the network administrator disables the front panel "clear password" and "factory reset" options, what must the administrator do to recover from a lost manager-level password?

- A. Press the "Reset" button and issue the command `no front-panel-security password-clear reset-on-clear` from the serial port within 60 seconds.
- B. Contact HP Customer Care to obtain a one-time use password.
- C. From the CLI, issue the command `no front-panel-security password-clear reset-on-clear` and press the "clear" button on the front panel.
- D. Telnet from a client on the management VLAN, issue the command `front-panel-security password-recovery` and type `pwrecover` at the password prompt.

Answer: B

QUESTION 2:

A software company uses 802.1X to authenticate all users on the network and to allow contract employees access to the network only during normal business hours. What is the best approach for configuring this time restriction?

- A. Configure a "Time Restriction" policy and assign the user accounts for each contract employee to the policy.
- B. Configure an access policy on the RADIUS server that associates a time restriction with usernames of the contract employees.
- C. Create a "contractors" group in Active Directory (LDAP) and assign time restrictions to the group.
- D. Configure an access policy on the RADIUS server that associates a time restriction with a "contractors" group.

Answer: D

QUESTION 3:

The network administrator of a university realizes that students in the on campus housing are connecting wireless access points and switches to the network. The administrator wants to limit a particular port to one MAC address at a time, but is not concerned about the actual address. Which security feature on the 5300xl provides flexibility while effectively limiting a port to a single MAC address at a time?

- A. Port security learn mode limited-continuous
- B. MAC lockdown learn mode limited-continuous

HP0-757

- C. MAC lockout learn mode limited-continuous
- D. 802.1X MAC authentication

Answer: A

QUESTION 4:

You have a new customer who is very concerned about the security of his internal campus network. You suggest that the HP ProCurve Access Control Solution may provide the level of safety and security that he is looking for. Which options are part of the HP ProCurve Access Control Solution? Select THREE.

- A. Web Authentication
- B. Intrusion Detection Systems
- C. Hardware Firewalls
- D. Access Control Lists
- E. 802.1X Authentication
- F. Virtual Private Networks
- G. Anti-Virus Software

Answer: ADE

QUESTION 5:

A pharmaceutical company has recently moved into a new three-story office building. They are sharing a core routing switch between two departments: human resources, and research and development. Both departments have edge switches deployed and neither department wants the other to have management access to their respective HP ProCurve edge switches. Which security measures would be recommended to limit management access to the respective departments? Select TWO.

- A. SSH
- B. SSL
- C. Authorized IP Managers
- D. management VLANs
- E. Microsoft Windows User Domain Security limits

Answer: CD

QUESTION 6:

The HP ProCurve Access Control Security Solution is primarily designed to protect the edge of the internal network. Which problem could be solved by implementing the Access Control Security Solution?
