Lotus

IBM Lotus Notes Domino 8 App Development Intermediate Skills

Thousands of IT Professionals before you have already passed their 190-835 certification exams using the Lotus 190-835 Practice Exam from ipass4sure.com. Once you start using our 190-835 exam questions you simply can't stop! You are guaranteed to pass your Lotus 190-835 test with ease and in your first attempt.

Here's what you can expect from the [ipass4sure](http://ipass4sure.com) Lotus 190-835 course:

- * Up-to-Date Lotus 190-835 questions designed to familiarize you with the real exam.
- * 100% correct Lotus 190-835 answers you simply can't find in other 190-835 courses.
- * All of our tests are easy to download. Your file will be saved as a 190-835 PDF.
- * Lotus 190-835 brain dump free content featuring the real 190-835 test questions.

Lotus 190-835 Certification Exam is of core importance both in your Professional life and Lotus Certification Path. With Lotus Certification you can get a good job easily in the market and get on your path for success. Professionals who passed Lotus 190-835 Certification Exam are an absolute favorite in the industry. If you pass Lotus 190-835 Certification Exam then career opportunities are open for you.

Our 190-835 Questions & Answers provide you an easy solution to your Lotus 190-835 Exam Preparation. Our 190-835 Q&As contains the most updated Lotus 190-835 real tests. You can use our 190-835 Q&As on any PC with most versions of Acrobat Reader and prepare the exam easily.

Question: 1

Daniel is designing a Suggestions application and wants to minimize replication conflicts. Which one of the following will accomplish this?

A. Assign users Editor access to the database.

Create a form of type Document and name the form 'Suggestion'. Create a form of type Comment and name the form 'Comments'.

Use Authors fields on both forms.

B. Assign users Author access to the database.

Create a form of type Document and name the form 'Suggestion'. Create a form of type Comment and name the form 'Comments'.

Use Readers fields on both forms.

C. Assign users Author access to the database.

Create a form of type Document and name the form 'Suggestion'. Create a form of type Response and name the form 'Comments'.

Use Authors fields on both forms.

D. Assign users Editor access to the database.

Create a form of type Document and name the form 'Suggestion'. Create a form of type Response and name the form 'Comments'.

Use Readers fields on both forms.

Answer: C

Question: 2

The "Job Opportunities" database is accessed regularly by many employees at Gayla's company. The database has been replicated to local servers at each of the company's 20 locations.

Although Gayla has created a full-text index (including the indexing of attachments) on a hub server and verified that the hub replicates to all of the distributed servers, her users complain that searches are very slow, and they are unable to use the "Fill out example form" search feature that they CAN use in some other databases. What could be done to fix this problem?

A. Gayla needs to click the Create index button on the Full Text tab of the database Properties on each of the replica databases.

B. Gayla needs to select the "Replicate view search indices" parameter on the database Properties Advanced tab on each of the replica databases.

C. The Notes administrator needs to increase the number of minutes specified by the ReplicationTimeLimit parameter in the hub server's Notes.ini file.

D. Gayla needs to select the "Replicate view search indices" parameter on the database Properties Advanced tab on the database on the hub server.

Answer: A

Question: 3

Roselia changed the "By Status" view in her workflow database. She selected the "Don't show empty categories" row property for the view. Why would she have done this?

A. Database performance needs to be improved. Roselia has set this property so that the view index will be smaller, allowing for faster indexing and faster opening of the view.

B. Document access is restricted with Readers fields. Roselia needs to ensure that each Status category only displays when the category contains at least one document to which the user has access.

C. There are 5 different values possible for the Status field, but often all documents have a Status of "Closed". Roselia wants to show each category only when there is at least one request with that Status.

- D. Many new requests entered into this database every week. Roselia is worried about the database size. She has set this property to reduce the size of the index of the main view of the database to save disk space.

Answer: B

Question: 4

Which one of the following contains data types stored as summary data by default?

- A. Text, number, date/time, reader names
- B. Text, text lists, rich text
- C. All data types are stored in the summary buffer
- D. Rich text, file attachments, embedded OLE objects

Answer: A

Question: 5

Norah wants to provide navigation on the left side of the screen and content on the right side. The navigation should have links to views, with some links inside collapsed folders. It should also have links for actions, using custom icons for the links. Can this be done?

- A. No. Notes navigators are no longer supported, and Pages, Frames, and Framesets are for Web applications.
- B. No. Most of this can be built using outlines, pages, frames, and framesets. But icon graphics must be selected from those provided in the notes\data\domino\icons folder.
- C. Yes. Create an outline with links for views and actions. Custom icons can be used. Put the outline on a page. Put the page in the left-hand frame of a frameset. The right-hand frame will hold the content.
- D. Yes. Create a Notes navigator object with an image bitmap for the navigation, placing an embedded editor on the right for the content. Create clickable areas on the navigator image to link to views and actions.

Answer: C

Question: 6

Greg has created a form with several fields that get their data from an external relational database system based on a key field. DECS is installed. Which one of the following must he have done to achieve this functionality?

- A. Created an embedded RDBMS link
- B. Created a data connection resource
- C. Created an ODBC connection resource
- D. Manually imported the data from the relational database

Answer: B

Question: 7

The graphics department has sent Horacio a JPEG image to be used as the icon for his new database. What should Horacio do so that this image appears as the database icon?

- A. Use a graphics program to convert the image to a 16x16 pixel GIF. Copy the GIF to the Clipboard. Open the database in Designer, and from the Design pane, select Other > Database Resources. Double-click Icon and click Paste.

- B. Use a graphics program to convert the image to a 32x32 pixel bitmap. Copy the bitmap to the Clipboard. Open the database in Designer, and from the Design pane, select Other > Database Resources. Double-click Icon and click Paste.
- C. Use a graphics program to convert the image to a 32x32 pixel GIF. Open the database in Designer, and from the Design pane, select Shared Resources > Images. Click "New Image Resource" and select the filename of the image. From the Design pane, select Other > Database Resources. Double-click Icon, click "Select from Image Resource" and select the image.
- D. Use a graphics program to convert the image to a 16x16 or larger square image. Open the database in Designer, and from the Design pane, select Shared Resources > Images. Click "New Image Resource" and select the filename of the image. From the Design pane, select Other > Database Resources. Double-click Icon, click "Select from Image Resource" and select the image.

Answer: B

Question: 8

Jim created a discussion database with documents and response documents. When changes are made to a response document, Jim wants to update the parent document. Which one of the following system fields in the response document indicates the associated parent document?

- A. \$Ref
- B. \$Doc
- C. \$ParentDoc
- D. \$ParentRef

Answer: A

Question: 9

If possible, Shannon would like to take advantage of the features of Composite Applications within a single Notes database. She has no need to access data from any other application. Can she deploy a Composite Application that includes the composite application definitions and the NSF component all within a single NSF?

- A. Yes. She can store the Composite Application definitions and the NSF component in the same database. When specifying the Notes URL of the Component Properties, Shannon should designate the url as notes:///_self
- B. Yes. She can store the Composite Application definitions and the NSF component in the same database. When specifying the Notes URL of the Component Properties, Shannon should designate the url as notes:///0000000000000000
- C. No, but although the Composite Application definitions and the NSF component cannot be stored in the same database, they can be referenced from the same database. From this composite application, she can then refer to other Notes databases and NSF components using Notes URLs.
- D. No. Composite Applications are intended to leverage pieces of separate applications to combine in a single context. There would be no benefit to be gained from placing the overhead of Composite Applications on a single Notes application.

Answer: B

Question: 10

Marie's Windows PC has recently been upgraded to use Notes 8 Standard edition. She is preparing to develop her first Composite Applications. Marie notices that Eclipse is not listed among the applications on her PC. What steps should Marie follow so that Eclipse is properly installed and configured for use with her Notes environment?
