IBM Lotus Notes Domino 8 Application Development Update

Thousands of IT Professionals before you have already passed their 190-801 certification exams using the Lotus 190-801 Practice Exam from ipass4sure.com. Once you start using our 190-801 exam questions you simply can't stop! You are guaranteed to pass your Lotus 190-801 test with ease and in your first attempt.

Here's what you can expect from the [ipass4sure](http://ipass4sure.com) Lotus 190-801 course:

- * Up-to-Date Lotus 190-801 questions designed to familiarize you with the real exam.
- * 100% correct Lotus 190-801 answers you simply can't find in other 190-801 courses.
- * All of our tests are easy to download. Your file will be saved as a 190-801 PDF.
- * Lotus 190-801 brain dump free content featuring the real 190-801 test questions.

Lotus 190-801 Certification Exam is of core importance both in your Professional life and Lotus Certification Path. With Lotus Certification you can get a good job easily in the market and get on your path for success. Professionals who passed Lotus 190-801 Certification Exam are an absolute favorite in the industry. If you pass Lotus 190-801 Certification Exam then career opportunities are open for you.

Our 190-801 Questions & Answers provide you an easy solution to your Lotus 190-801 Exam Preparation. Our 190-801 Q&As contains the most updated Lotus 190-801 real tests. You can use our 190-801 Q&As on any PC with most versions of Acrobat Reader and prepare the exam easily.

QUESTION: 1

Kyle is designing a Composite Application that can send a user name from a form to a view, by clicking a button on the form. He knows he wants to define a Wiring property called ReceiveUserName that will be used when the view is receiving a user name string that is published by the form. When he opens the Property Broker Editor to define "ReceiveUserName", what does he define it as?

- A. Type
- B. Action
- C. Event
- D. Property

Answer: B

QUESTION: 2

Kristen has been asked to develop a Composite Application to "wire" the Customer, Orders, and Inventory applications together. She understands that this will result in communication among the different pieces of the new application. How does this communication work?

- A. Components use the Composite Application Broker to communicate with each other. The Composite Application Editor is used to define Actions and their parameters, and to configure Property Broker options.
- B. Components use the Composite Application Broker to communicate with each other. The Composite Application Editor is launched from Domino Designer to define Broker Properties and configure Actions and their parameters.
- C. Components use the Property Broker to communicate with each other. The Property Broker Editor is launched directly from Domino Designer (or can be launched via the CAE) to define Properties and configure Actions and their parameters.
- D. Components use the Property Broker to communicate with each other. Domino Designer must first be used to define the Wiring Properties. Composite Application Broker options can then be configured using the Composite Application Editor or from within Domino Designer.

Answer: C

QUESTION: 3

Myrtle is modifying the design of a View in a Notes database, so it can update a published Property that the other components in a Composite Application can respond to. Where does she write code that updates a Property?

- A. In a view action
- B. In the OnSelect event of the view
- C. In the QueryModeChange event of the view
- D. In the Initialize subroutine of the Global section of the view

Answer: B

QUESTION: 4

Beatrice created a new Composite Application database in the Notes 8 client, but when she opens it up she sees a grey page that says "This Application page does not contain any content." What does she have to do next?

- A. Click the menu option "View - Design" to open the database in Domino Designer to edit the Composite Application definition.
- B. Click the menu option "Actions - Edit Application" to open the database in the Composite Application Editor to edit the Composite Application definition.
- C. Double-click the grey page to open the database in the Composite Application Editor to edit the Composite Application definition.
- D. Right-click the grey page to open the database in Domino Designer to edit the Composite Application definition.

Answer: B

QUESTION: 5

When Bert is designing his Composite Application, he wants to have a Notes view that publishes a UserName property to another view and also to a Notes form that is open in edit mode. How does he do this?

- A. He simply uses the Composite Application Editor to wire all three components together.
- B. He creates one Composite Application that wires the two views together, and then a second Composite Application that incorporates the first one, with the first view wired to the form.
- C. Because each component can only publish a single property, he has to wire the first view publish the user name to the second view, and then wire the second view to publish the user name to the form.
- D. Because he can publish a property only to a single component, he has to make his first view publish two properties (e.g. UserName1 and UserName2) that both have the same data, so that one of the properties is wired to the second view and the other is wired to the form.

Answer: A

QUESTION: 6

Scott has just created a new NSF-based Composite Application. He has added two components to his application and is about to close the Composite Application Editor (CAE). What does he need to do if he now wants to see how his Composite Application appears in the user interface?

- A. Scott will not be able to open the Composite Application within the user interface yet. The database launch properties must first be set to "Launch as Composite Application".
- B. Nothing. The CAE is opened from within the Composite Application. When Scott exits the CAE, he is automatically presented again with the Composite Application, open in the user interface.
- C. Scott will not be able to open the Composite Application within the user interface yet. He will first need to open the Composite Application using Domino Designer and set the Wiring Properties.
- D. When Scott exits the CAE, he is back at the Notes Workspace, just as when exiting other NSF-based applications. Double-click on the Composite Application's icon on the Workspace to open it in the user interface.

Answer: B

QUESTION: 7

Barry has just closed the Property Broker Editor after specifying input and output Action parameters for his Composite Application Editor (CAE). He notices a curved arrow icon in Domino Designer next to the name of the Wiring Property. What should Barry do to ensure that his changes are saved within his Domino application?

- A. Click the "Refresh" button, and then click the "Open" button in the window that displays.
- B. Nothing. The Property Broker automatically saves changes inside the Domino application.
- C. Click the "Merge WSDLs" button and click "OK" in the confirmation prompt that then displays.
- D. Open the Wiring Property properties and ensure that the "Store in NSF" option is selected. The changes will be saved within the Domino application when Domino Designer is closed.

Answer: A

QUESTION: 8

Samir wants to design and deploy a Composite Application that consists of components from two Lotus Notes databases that both reside on the same Domino Server. He would like to include
