A new employee has been hired by Company A to fill a new function as a global LDAP administrator. This employee will also be responsible for performing tasks within the payroll system and performing updates in the sales system.

Company A is using IBM Tivoli Identity Manager (ITIM) V5.0 to provision new users into the corporate information technology resources shortly after they have been hired. Some resources have restricted access and require specific approvals or other information before a new user account is created.

User accounts will be provisioned for all new users appearing in the HR feed that IBM Tivoli Identity Manager V5.0 receives on these target systems:

- Active Directory
- Enterprise LDAP User
- Exchange

These target systems require the user first-line manager approval before the account is provisioned:
