Here's what you can expect from the [ipass4sure](http://ipass4sure.com) IBM 000-299 course:

- * Up-to-Date IBM 000-299 questions designed to familiarize you with the real exam.
- * 100% correct IBM 000-299 answers you simply can't find in other 000-299 courses.
- * All of our tests are easy to download. Your file will be saved as a 000-299 PDF.
- * IBM 000-299 brain dump free content featuring the real 000-299 test questions.

IBM 000-299 Certification Exam is of core importance both in your Professional life and IBM Certification Path. With IBM Certification you can get a good job easily in the market and get on your path for success. Professionals who passed IBM 000-299 Certification Exam are an absolute favorite in the industry. If you pass IBM 000-299 Certification Exam then career opportunities are open for you.

Our 000-299 Questions & Answers provide you an easy solution to your IBM 000-299 Exam Preparation. Our 000-299 Q&As contains the most updated IBM 000-299 real tests. You can use our 000-299 Q&As on any PC with most versions of Acrobat Reader and prepare the exam easily.

QUESTION: 1

When implementing WebSphere Business Integration Message Broker, both the clients and their brokers may reside on different intranets. This causes problems when a client attempts to connect to a broker. Which of the following should be recommended if their user application uses JMS over HTTP?

- A. Use the WebSphere MQ Real-time Transport (JMS/IP) method.
- B. Use the WebSphere MQ Telemetry Transport (SCADA) method.
- C. Use the WebSphere MQ Enterprise Transport (MQ) method.
- D. Use the WebSphere MQ Mobile Transport (WMQe) method.

Answer: A

QUESTION: 2

An insurance company needs to integrate its IT system with another company after a merger. WebSphere MQ is already used by both companies and WebSphere Business Integration Message Broker is being considered as a possible solution. Transformation and routing will be performed locally at each company's data center. The WebSphere Business Integration Message Broker solution must be capable of routing to multiple end points based solely on the content of the message data. What key feature of WebSphere MQ and WebSphere Business Integration Message Broker will support this requirement?

- A. Transaction support
- B. MQSeries clustering
- C. Destination list support
- D. Multi-broker support

Answer: C

QUESTION: 3

A bank is implementing a process to supply the hourly currency exchange rate information to all their branches. Once every hour, the bank sends the information to the branches. The branches must receive the information. What is the simplest way to do this using WebSphere Business Integration Message Broker?

- A. Build DestinationData[] in LocalEnvironment, then use MQOutput Destination Mode to dynamically route to branch queues.
- B. Store exchange rate information in a database and send a publication to the branches every hour.
- C. Send publications every hour and require branches to use content-based subscription.

D. Use persistent publications and have the branches subscribe to the corresponding topic.

Answer: D

QUESTION: 4

A company requires a message transformation based on database lookups from multiple data sources. The user ids for these data sources are different from the broker data base user id. Which of the following WebSphere Business Integration Message Broker features is used to handle this case?

- A. Use the mqsischangebroker command.
- B. Use the Promote Message flow feature.
- C. Use the mqsisetdbparms command.
- D. Use the mqsischangeproperties command.

Answer: C

QUESTION: 5

A company has its legacy formats as either 'C' header files or COBOL copybooks. After they have been imported, and the message definition files are complete, the message set can then be generated in a form that can be used by an application. Which of the following formats will the WebSphere Business Integration Message Broker NOT be able to generate?

- A. A message dictionary
- B. A XML Schema file
- C. Web Services Description Language (WSDL) file
- D. A DTD file

Answer: D

QUESTION: 6

A bank implementing an Internet banking solution will allow account holders having more than one account with the bank to transfer money between their own accounts. If the transfer succeeds, then the bank must log the transfer in a database for auditing purposes. Which of the following WebSphere Business Integration Message Broker functionalities is required to determine if the database will be updated successfully?

- A. Access Control List (ACL)
- B. Transactional support

- C. ESQL
- D. WebSphere MQ Real-time (JMS/IP) Transport

Answer: B

QUESTION: 7

A large manufacturing company in London has recently merged with a similar sized company in Paris. The computer systems in each company are based on different hardware and software and both have an existing WebSphere Business Integration Message Broker Configuration Manager and Broker installed. New message flows need to be defined. The London-based administration department is allowed to administer only the London system, the Paris-based administration department is allowed to administer only the Paris system. Which of the following will provide a means to jointly create and manage message flows between London and Paris with minimal changes to the topology of the two existing WebSphere Business Integration Message Broker systems?

- A. Create a new execution group under the WebSphere Business Integration Message Broker in London and administer from London.
- B. Create a new execution group under the WebSphere Business Integration Message Broker in London and administer from London or Paris.
- C. Place both domains under the same source control manager.
- D. Create a third WebSphere Business Integration Message Broker Configuration Manager and broker to manage message flows between London and Paris.

Answer: C

QUESTION: 8

What is the BEST practice when designing a broker domain?

- A. Share the Broker's Queue Manager with the Configuration Manager.
- B. Increase the number of Brokers when handling large messages.
- C. Add one UserNameServer for each Broker.
- D. Use a remote database for the Broker repository.

Answer: B

QUESTION: 9

A customer wants to build corporate data from their manufacturing equipment into their inventory control program running on z/OS. The manufacturing equipment is currently controlled and monitored through a set of Allen-Bradley devices. What is the simplest way to feed the manufacturing equipment data through a message
