IBM

IBM WebSphere Portal V5.1, Deployment and Administration

Thousands of IT Professionals before you have already passed their 000-397 certification exams using the IBM 000-397 Practice Exam from ipass4sure.com. Once you start using our 000-397 exam questions you simply can't stop! You are guaranteed to pass your IBM 000-397 test with ease and in your first attempt.

Here's what you can expect from the [ipass4sure](http://ipass4sure.com) IBM 000-397 course:

- * Up-to-Date IBM 000-397 questions designed to familiarize you with the real exam.
- * 100% correct IBM 000-397 answers you simply can't find in other 000-397 courses.
- * All of our tests are easy to download. Your file will be saved as a 000-397 PDF.
- * IBM 000-397 brain dump free content featuring the real 000-397 test questions.

IBM 000-397 Certification Exam is of core importance both in your Professional life and IBM Certification Path. With IBM Certification you can get a good job easily in the market and get on your path for success. Professionals who passed IBM 000-397 Certification Exam are an absolute favorite in the industry. If you pass IBM 000-397 Certification Exam then career opportunities are open for you.

Our 000-397 Questions & Answers provide you an easy solution to your IBM 000-397 Exam Preparation. Our 000-397 Q&As contains the most updated IBM 000-397 real tests. You can use our 000-397 Q&As on any PC with most versions of Acrobat Reader and prepare the exam easily.

QUESTION 1:

The administrator executed the following wpsconfig command to create a wps database in DB2.

```
WPSconfig create-wps-db-DDbPassword=<password>
```

Why did the administrator specify the password property on the command line?

- A. For security reasons, passwords should not be stored in the wpsconfig.properties file. Password can be provided on the command line when executing the configuration task.
- B. For security reasons, the -D prefix of the password property will delete the password in wpsconfig properties file after executing the configuration task.
- C. For security reasons, the command line password is used to verify against the password set in the wpsconfig.properties file.
- D. For security reasons, DB2 server will not use the password directly from the command line to its servers.

Answer: A

QUESTION 2:

After installing a Portlet Application to a Portal Cluster, an administrator sees the following message.

"Portlets were successfully installed, but could not be activated at this time. Please manually activate the portlet application in the Manage Applications portlet"

Which of the following BEST describes the reason for this message?

- A. The portlets could not be activated because the cluster nodes need to be stopped when deploying portlets
- B. Portal cannot guarantee that the portlet has been synchronized to each clustered node, so it does not automatically activate it.
- C. This message occurs because there are two or more clustered Portal Servers on the same node, and they are not all stopped.
- D. The DeploymentService.properties file has not been updated with the cluster name.

Answer: B

QUESTION 3:

A user reports getting the following message on the login page: "Login failed.Please specify a valid ID and password." Which of the following is the MOST probable cause?

- A. WebSphere Portal has public session enabled
- B. WebSphere Application Server does not have global security enabled
- C. The user was enrolled with the wrong suffix in the LDAP directory

D. There is time synchronization problem between the user's login machine and the LDAP server

Answer: C

QUESTION 4:

Which of the following files contains the output generated by enabling WebSphere Portal v5.1?

- A. <wp_root>/log/SystemOut_<date_time>.log
- B. <wp_root>/log/wps_<date_time>.log
- C. <wp_root>/log/SystemErr.log
- D. <wp_root>/log/native_stdout_<date_time>.log

Answer: B

QUESTION 5:

When problems occur in the production environment, the administrator should review and inspect logs to detect the source of the problem. What should the administrator do once a problem has been detected and more information is needed to further investigate?

- A. By default, detailed WebSphere Portal information is captured in the activity.log.No further tracing is required
- B. Enable tracing for WebSphere Portal to capture messages and trace information in wps Trace.log
- C. Enable tracing for WebSphere Portal trace through the AdminConsole and error information will be captured in SystemErr.log
- D. Enable WebSphere Portal trace through the AdminConsole and error information will be captured in SystemErr.log

Answer: C

QUESTION 6:

Consider the following error from the WebSphere Portal run-time log: 2003.05.16 13:36:14.449 w Com.ibm.wps.services.database.DataStoreServiceimplInit DSTO0063W. The transaction isolation level is not set to READ_COMMITTED. What does DSTO0063W refer to in this error message?

- A. The logmessage describing the logged event.
- B. The classification of the type of message or traces
- C. The messaeocode that uniquely identifies the specific message

D. The name of the Java method containing the code that triggered the log event

Answer: C

QUESTION 7:

After adding WebSphere Portal to the cluster, the administrator accesses Portal using `http://<url to cluster>/wps/portal` and receives error page not found on the browser". Which of the following actions should the administrator perform to begin troubleshooting this error?

- A. Check that plugin-cfg xml has been copied over from the WebSphere Portal nodes to the deployment manager and the nodes have been synchronized.
- B. Check that plugin-cfg xml has been copied over from the IBM HTTP Server to all WebSphere Portal nodes have been synchronized.
- C. Check that the web server host name has been added to the virtual host for the WebSphere Portal cluster and the nodes have been synchronized.
- D. Check that plugin-cfg xml has been regenerated, copied to the IBM HTTP Server, and the IBM HTTP Server has been restarted

Answer: D

QUESTION 8:

An administrator has added the Reminder portlet to the publically accessible Welcome page so that all users will see this reminder in their virtual portal Welcome page as well. However, all virtual portal users claimed that they cannot see the Reminder portlet. Which of the following BEST describes what happened?

- A. The administrator did not restart WebSphere_Portal server to propagate the changes to all virtual portal Welcome Page.
- B. The Reminder portlet needs to be added to each virtual Welcome page manually
- C. The Reminder portlet was not installed on the virtual portal.
- D. Users have not been assigned with VIEW access to the Reminder portlet.

Answer: B

QUESTION 9:

Which of the following properties files are used by migration tasks during WebSphere Portal migration?

- A. AccessControlConfigService.properties and ConfigService properties
- B. migratePortalCore.properties and migrateConfigService.properties
- C. PumaService.properties and Deployment Service.properties
- D. Mig_core properties and mig_wmm.properties
