000-175

IBM
IBM eServer pSeries Solution Sales

Thousands of IT Professionals before you have already passed their 000-175 certification exams using the IBM 000-175 Practice Exam from ipass4sure.com. Once you start using our 000-175 exam questions you simply can't stop! You are guaranteed to pass your IBM 000-175 test with ease and in your first attempt.

Here's what you can expect from the ipass4sure IBM 000-175 course:

* Up-to-Date IBM 000-175 questions designed to familiarize you with the real exam.
* 100% correct IBM 000-175 answers you simply can't find in other 000-175 courses.
* All of our tests are easy to download. Your file will be saved as a 000-175 PDF.
* IBM 000-175 brain dump free content featuring the real 000-175 test questions.

IBM 000-175 Certification Exam is of core importance both in your Professional life and IBM Certification Path. With IBM Certification you can get a good job easily in the market and get on your path for success. Professionals who passed IBM 000-175 Certification Exam are an absolute favorite in the industry. If you pass IBM 000-175 Certification Exam then career opportunities are open for you.

Our 000-175 Questions & Answers provide you an easy solution to your IBM 000-175 Exam Preparation. Our 000-175 Q&As contains the most updated IBM 000-175 real tests. You can use our 000-175 Q&As on any PC with most versions of Acrobat Reader and prepare the exam easily.

Question: 1
AIX 5L and SUN Solaris have differing approaches at handling processor failures. Which statement best describes how AIX handles processor failures?

A. If AIX discovers a processor with too many recoverable errors during runtime, it will dynamically turn off that processor, while the rest of the system keeps running.
B. If AIX detects a failing processor it will automatically move all resources to another processor. The failed processor can be hot-swapped and the new replacement becomes the active processor.
C. If AIX determines a processor is failing, it will perform diagnostics to determine which processor function can be disabled and dynamically reallocate all CPU and memory resources thus isolating the failure condition and preventing a reboot.
D. If AIX senses a processor level error condition, internal diagnostics are activated to determine the severity of the problem. After the failure threshold is met, a message is broadcast to the service processor informing the operator to perform a system reboot.

Answer: A

Question: 2
In addition to better overall price performance, which other factor most significantly contributes to a lower three-year TCO advantage for a pSeries customer than for a SUN customer?

A. Sharing commonly used peripherals
B. Maximum capacity of CPU, Memory and I/O
C. Minimum number of processors in a partition
D. Support for different versions of the operating system

Answer: C

Question: 3
A data processing company is comparing the specifications of the SunFire 6800, SunFire 12k and the IBM pSeries 670 for a server consolidation project. Which of the following p670 capabilities would provide the most significant benefit for server consolidation?

A. Maximum memory
B. Maximum processor speed
C. Maximum number of PCI slots
D. Maximum number of partitions

Answer: D

Question: 4
A manufacturing business is presently supporting multiple UNIX platforms and considering the advantages of consolidating environments, adding new applications and standardizing on HP-UX with IA-64. Which advantage should be communicated as the most compelling reason to consider pSeries as the platform of choice?

A. The pSeries family of servers offers many choices from small entry servers to data-center class systems
B. pSeries systems support both AIX and Linux operating systems providing a single platform for both environments
C. AIX contains the tools and utilities necessary to convert all their UNIX software onto a single pSeries server
D. Thousands of AIX operating system-based applications, middleware, and tools are available today and already optimized

Answer: D

Question: 5
An HP customer would like to discuss IBM system advantages. Their current system platform is a partitioned HP rp8400. Which of the following pSeries systems and advantages should be discussed?

A. p630. Maximum partitions, maximum storage, I/O bus speed
B. p670. Maximum partitions, maximum memory, number of I/O slots
C. p655. Maximum number of CPUs, processor speed, number of I/O slots
D. p690. Maximum number of CPUs, peak system bandwidth, peak I/O bandwidth

Answer: B

Question: 6
A sportswear company recently had a visit from a sales rep of a well-known computer vendor. The sales rep gave a presentation on the advantages of VPAR and NPAR. Which of the following companies made this presentation?

A. HP
B. IBM
C. SUN
D. Dell

Answer: A

Question: 7
An HP UNIX server customer running Oracle is interested in knowing more about IBM's future direction because of the uncertainty of HP hardware platforms changing to Itanium. Which of the following advantages should be communicated as a compelling reason to consider a pSeries server solution?

A. IBM pSeries servers support Oracle on both POWER4 and Itanium
B. AIX has Itanium affinity with any ISV application including Oracle
C. Oracle and thousands of other ISV applications are already available for AIX on pSeries
D. IBM Data Migration Services can migrate the HP UNIX operating system to a pSeries solution

Answer: C

Question: 8
On what metrics is Software Maintenance for AIX (SWMA) priced?

A. Clock speed and memory capacity
B. AIX version and number of users
C. pSeries class and number of CPUs
D. pSeries model and number of LPARs

Answer: C

Question: 9
A customer with p615, p630 and p650 pSeries servers installed and running AIX is considering Linux as an additional environment. Which Linux capabilities can the pSeries Sales Specialist present as choices that are available to enhance the existing systems?

iPASS4SURE
Get Certified

Pass4sure $89 Lifetime Membership Features;

- Pass4sure $89 Lifetime Membership includes Over **2100** Exams in One Price.
- **All** Pass4sure Questions and Answers are included in $89 package.
- **All** Pass4sure audio exams are included **free** in $89 package (See List).
- **All** Pass4sure study guides are included **free** in $89 package (See List).
- **Lifetime** login access, no hidden fee, no login expiry.
- **Free updates** for Lifetime.
- **Free Download Access** to All new exams added in future.
- Accurate answers with explanations (If applicable).
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions, Answers and Study Guides are downloadable in **PDF** format.
- Audio Exams are downloadable in **MP3** format.
- **No authorization** code required to open exam.
- **Portable** anywhere.
- 100% success *Guarantee*.
- **Fast**, helpful support 24x7.
