If you pass IBM 000-858 Certification Exam then career opportunities are open for you.

Our 000-858 Questions & Answers provide you an easy solution to your IBM 000-858 Exam Preparation. Our 000-858 Q&As contains the most updated IBM 000-858 real tests. You can use our 000-858 Q&As on any PC with most versions of Acrobat Reader and prepare the exam easily.

QUESTION 1:

Certkiller .com has deployed a new J2EE-based application running on their iSeries with WAS 5 (Base). The transaction response time is slow, and they want to determine the relative response time of each servlet component. Which of the following tools should be used?

- A. iDoctor for iSeries
- B. OS/400 Performance Tools
- C. Tivoli Performance Viewer
- D. Performance Trace Data Visualizer

Answer: C

QUESTION 2:

Certkiller .com has a model 270 running an HTTP server in their DMZ. They also have an i825 running WAS and the core business logic behind the firewall in the internal network. SSL is up between the end user and the HTTP server. Which of the following describes the security issue that still exists?

- A. Server identification for the client
- B. Data integrity between the client and HTTP server
- C. Data confidentiality between the HTTP server and WAS
- D. Data confidentiality between WAS and the core business logic

Answer: C

QUESTION 3:

Certkiller .com has an application that uses servlet chaining running on WAS - Express v5.0 on a windows server. The customer would like to move the application to a new iSeries system. Which tool should be used to size the new iSeries system?

- A. Performance Explorer
- B. Patrol for WebSphere Application server - predict
- C. eServer Workload Estimator
- D. WebSphere Resource Analyzer

Answer: C

QUESTION 4:

What part of WDS is used to debug servlet and JavaServer Pages?

- A. Integrated HTTP Server
- B. Remote System Explorer

- C. Integrated Debugger and Test Environment
- D. iSeries integrated debugger

Answer: C

QUESTION 5:

The HTTP Server Administration Interface can perform most WAS - Express administrative tasks. However, the full function WAS administrative console must be used for which of the following tasks?

- A. Configuring a virtual host
- B. Configuring a JDBC resource reference
- C. Configuring a JDBC provider and data source
- D. Installing, starting, or stopping an application

Answer: B

QUESTION 6:

Certkiller .com is implementing a new EJB -based financial application that requires transactional support. Which of the following technique should they use to ensure optimal performance?

- A. Access the Entity beans directly.
- B. Define all EJB methods as read/write capable.
- C. Maximize the size of all HTTP session objects.
- D. Set the appropriate transaction isolation level.

Answer: D

QUESTION 7:

An I5/OS customer with WebSphere Portal - Express plans to create a portlet for wireless access. Which of the following can be used to develop this portlet?

- A. Mobile Application Builder
- B. WDS Sc Advanced Edition
- C. WebSphere Studio Device Developer
- D. WebSphere Portal Application Integrator

Answer: B

QUESTION 8:

A WDS Sc developer can use the internal WAS test environment to test and debug their code. What WDS Sc functionality can be used to test and profile the WAS application running on the iSeries?
